As stated above, the entire program is still tentative, and the PacCom reserves the right to make any changes it feels necessary. We are printing our tentative program because we feel that fans and writers have a right to know something about our plans for Worldcon XXII.

The parties scheduled every evening will be held in a suite reserved exclusively for the convention and is located near the meeting rooms. It was our experience at the Westercon that the scheduling of an "open" party each evening helped to make for a better convention, and we have been strongly urged to continue this item for the Pacificon. Each party will be sponsored by some group who will agree to provide potables. If any group or individual wishes to reserve a party, we would appreciate it very much if they would get in touch with the PaCCom soon.
