

AN INDEX TO THE FIRST FIVE YEARS OF THE SFPA

MAILINGS 1 - 20

Prepared by Dave Hulan, Box 422, Tarzana, California, for the 21st Mailing of the Southern Fandom Press Alliance. Jøtun Publication 170.

This addition of the SFPA Index incorporates all corrections that I have been made aware of in the first Index, and adds the 17th-20th Mailings to the Index. Format is similar to that of the last, except that I have decreased the amount of information under each head somewhat. Repro is given only on the author index, page-count is omitted from the title index, and the mailing in which the material appeared is deleted from the author index. All information can be found out about a zine by cross-referring, but this typeface is larger and I doubt I could have squeezed everything in with it to the extent I did with the elite before. Repro symbols are: Hekto, h; ditto, d; mimeo, m; offset or litho, o; printing, p; anything else, s (for special). Handwork was not noted, although maybe it should have been.

Non-members' zines fraked in:

Carbo 10, d, 2 - Richie Benyo/Pete Jackson (Hulan frank)

Why Am I an Only Fan? 1, d, 8, Alan Mann (Rich Mann frank)

NOTE: I found that I had followed two contradictory procedures on membership numbers on a member's second membership. Last Index I let Rick Norwood retain his original number although he was out for one mailing and several members had joined after his original membership. His second number would have been 13 instead of 9, necessitating changing the number of everyone from Locke on up if I had decided to follow the practice of a new number for each membership. On the other hand, I had assigned Wally Weber a new number on his second membership. But I hadn't assigned anyone a later number, so it would involve only changing Wally from 37 back to his original 27. Need I say which I'm going to do? Have done? Since the numbers were assigned in my capacity as Oldest Member and Indexer, not as OE, I intend to keep on assigning numbers at my own discretion. If someone else, like the OE, wants to assign different numbers that's his privilege, but I won't recognize them in my indexes.
