 1:42 The END

COMMENTS:

We are very proud of the Film Schedule for this year, having nearly too many films in the time available to show them. Including the freebie shorts, there are 55 titles, and there is little space to comment on each. Briefly: the two Rendezvous shorts are by Cortland Hull, the Murderer is from a story in Golden Apples of the Sun, The Light Fantastik is on the techniques of animation, there are three of the Univ. of Kansas SF Series Films, Magnetic Telescope and Bulleeteers are 1942 Superman animated cartoons by Max Fleischer, and What every young boy and girl should know is a very strange sex-education film. The Sunday film to be announced will be your choice of Gigantis, Blob, Theatre of Blood, or Body Snatchers. Vote Saturday outside the film room. Changes in titles or timing will be posted outside Commonwealth! Please keep this with you and try not to nag the poor projectionists. Thanks for coming - hope you enjoy the program.

Bill Carton
