

Opening Ceremony

“Isn’t it majestic?” said Follycon chair Alison Scott as she opened the opening ceremony, before introducing everyone. The audience ignored her request not to clap (“Or we will run out of time,” said Alice.) We didn’t.

Entertainment was provided by Michael Abbott leaping up and down pointing out where everything was on the map. And we were warned that the pocket programme was a week out of date, so use the app, the same app that told Alice the opening ceremony was about to start just as it finished.

And all the guests have turned up, as well as two people who mistakenly booked lunch this weekend, so ignore them.

Welcome from the Chair

Following my welcome in the Souvenir Book, my welcome in the Read Me (which you should all read by the way), and my welcome speech at the opening ceremony, I realised I hadn’t had sufficient chance to expound in depth on my thoughts at the beginning of this august occasion so I thought I would take this opportunity... *[that’s enough welcomes from the Chair - Ed.]*

Fire alarm

The fire alarm is a siren. It isn’t due to be tested during Follycon. If it goes off, gather on the West Terrace.

Restaurant booking

Harrogate boasts many different styles of restaurant: there are Italians on Albert

Street; and Indian, Chinese and Thai on Cheltenham Parade. However, they get very busy, especially on Saturday evening. Booking is strongly advised. And please remember to send in your restaurant reviews!

Larger print available

Large print versions of the Programme Book and Read Me are available at Info Desk.

Grenadine issues

If anyone is having problems with Grenadine, make sure you have the most up-to-date version of the app, and restart the phone (power off and then on again) after updating.

Apologies

We’re sorry some people found they couldn’t get a hot meal after 8 pm yesterday. We have an evening buffet

(mains and sides) served from 5-8 but we also have burgers and jackets available 12-10, and the hotel has assured us that they can also do choices off their bar menu and room service. For all hot food please go to the ballroom, which also has a handy tea and coffee station for caffeine-deprived people on the run.

Breakfast vouchers

There aren't any! We decided not to use them in the end. Also, if you don't manage to get up for 11 am you can still get a breakfast bap by quoting your room number and saying that you didn't make it to breakfast

Access announcement

People who need assistance getting to Carriages Suite (Dealers Room and Art Show) please go to hotel reception where they will summon a ~~horse and carriage~~ golf buggy and driver. To arrange your return trip, contact the Radio Operator in Carriages.

Win a Guest of Honour!

We expect the kaffeeklatsches with our GoH to be very popular so are running lotteries for interested members. Sign up at the info desk at least two hours before each item; programme supremos will then randomly pick 12 winners and two reserves and provide their names for the info desk.

Sense, Sensibility and the Sublime

If anyone coming to the Heinlein talk has a visual impairment or other issue that makes reading projected slides difficult, please email farah.sf@gmail.com before

Saturday and request them.

Critical Masterclasses

On Saturday we will discuss "The New Atlantis" by Ursula Le Guin
www.lightspeedmagazine.com/fiction/the-new-atlantis/

On Sunday we will discuss "The Moon Over Red Trees" by Aliette de Bodard
www.beneath-ceaseless-skies.com/stories/the-moon-over-red-trees/

You must read the relevant story in advance if you want to attend one of the classes. Sign up at the Info Desk.

Art Show Grand Opening

7-9 pm. Come along and meet the artists. All welcome.

There's been a mur-durr!

In honour of Agatha Christie, who was found in Harrogate following her mysterious disappearance in 1926, Satellite 6 present a fannish murder mystery.

Follycon Chair Alison has been horribly murdered in a room at the Majestic. Suspicion has fallen on five members of her Committee. It is believed that one of the following was the murder weapon:

- i. A lanyard from Registration
- ii. A laminator from Ops
- iii. The Doc Weir Award
- iv. Poisoned wine from Green Room
- v. A copy of the Encyclopaedia of Science Fiction

Collect the clues to work out which committee member was in which room with which weapon and solve the crime! Hand in your answer to the Satellite 6 Con Table by 3 pm on Monday. A winner will be chosen at random from correct entries received.

Clue 1: For Michael and Phil, one had the wine and the other was in room 5.

The Daily Drabble

We challenge readers to enlighten us with your pseudoScience, presented in the form of a drabble (a story of exactly 100 words, excluding title). Some of the best received will appear in these pages.

To begin, an example from the Satellite 6 Chair

Insights into the genetic structure of *Clangers*

To date, studies on the exo-alien *Clangers* have largely been undertaken by SCT (Sitting Close to the Telly) spectroscopy. We report that coupling the spectrometer to established optical systems creates the novel hyphenated spectroscopic technique, SCT-MG (Sitting Close to the Telly - with a Magnifying Glass). This offers enhanced observations of Clangers allowing resolution of genetic structure to the molecular level. SCT-MG indicates that Clanger genetic structure is based on side-substituted biopolymers, specifically, terminal (omega) substituted poly-octyl-olefins (ω -ool). Initial observations suggest that this bio-polymer (*ply*) can form in one (single *ply*- ω -ool) or two (double *ply*- ω -ool) strands, analogous to terrestrial DNA/RNA.

From the Chair

Please remember we are keeping access lanes clear: don't obstruct them or put furniture in them. They are clearly marked with yellow tape. Please respect the needs of Con members with access badges. And please don't complain to volunteers who ask you to move out of the access lanes.

Sign-up items

Spaces are still available on many of Sunday's sign-up items, including the crafting workshops, poetry and beer tasting. Please go to Info Desk to put your name down.

Probing quality merchandise

If you can't wait for the fan fund auction on Sunday, and still have any money left after going to Friday's TAFF Extravaganza, do visit Claire Wardell's jewellery table in the Dealers Room. There you can buy lapel pins based on USPS stamps commemorating planetary probe missions - with all profits going to the fan funds.

Imagined Things

Harrogate bookshop *Imagined Things* is just down the hill from the Majestic. Opening hours over the Easter weekend are Saturday 10am-5:30pm, Sunday closed, Monday 10am-4pm. They have a couple of special author signing events today
3 pm: Science fiction authors
4 pm: Fantasy authors

Poster presentations

Don't forget to check out the excellent posters on display in the Half Moon. Check the signs in the poster area for times when individual presenters will be available to talk about their work.

Poetry

Poet Chrissy Williams has written a poem especially for the Newsletter:

Robot Unicorn Attack

(a love poem for a videogame)
Possibility bursts like a horse full of light, accelerating into a star. Explosion. Hit <X> to make your dreams crash into stone. Death. Diatonic chimes of joy. *I want to be with you.* Let dolphins fly in time. Swim through air, leap past sense, past sin and then hit <Z> to chase your dreams again. *Always. Harmony.* Up, smash goes the rainbow-trailing heart again. Again. Again, again! *I want to be with you* when make-believe is possible. I want to be with you when robot unicorns never cry, hit stars collapse in quiet love. When there is only love. *Harmony.* No shame.

Chrissy Williams

Chrissy will be appearing on *Poets on Poetry* at 4:30 pm on Saturday and *Poetry Comics Workshop* at noon on Sunday.

Please sign up for the workshop at Info Desk.

From the vaults

Follycon 88 ran out of real ale at noon on Saturday. Their hotel didn't believe the committee when they predicted how much beer fans could drink. We are pleased to report that Follycon 18 is in good shape, with 24 casks remaining.

SF in WW1

Prof Edward James' display on science fiction in WW1 is now in the Billiards Room. Do go and have a look. It is absolutely fascinating!

Smoking Area

Please don't smoke in the area outside hotel reception. Use the designated smoking areas.

Dealers Room

Please don't take large bags into the Dealers Room. If you're passing through on the way to a programme item in the Dance Studio, please make sure any drinks are in closed containers rather than open pints etc to avoid spillage on the shiny things!

Lifts and stairs

Please can everyone who is able use the stairs and leave the lifts for those who need them. And please try to have no more than four people in the lift at once. Otherwise it will break (again)!

Lost and found

One shoe, last seen half-way round the quagmire of the Harrogate Park Run.

Grenadine solution

If you downloaded the FOLLY18 schedule before the clocks changed last weekend your notifications may come an hour late. A workaround is to go to options, click on reminders, turn them off and then turn them back on (by selecting the minutes before).

The Daily Drabble:

An investigation into quantum uncertainty and the undead

In this experiment a vampire was tricked into wearing ski goggles with mirrored lenses. Mirrorshades reflect most light, the rest gets through. That should be the only light entering the goggles, so it should be able to see ahead. However, vampires don't reflect in mirrors; light from behind should hit the lenses, and should be visible to observers in front of it, and the vampire should see objects behind itself reflected in the lenses. This suggests some form of quantum uncertainty. In practice the vampire instantly crumbled to dust. Our tentative conclusion is that the universe really dislikes a smart-arse

Nnedi Okorafor Interview

Guest of Honour Nnedi Okorafor spoke openly about how scoliosis ended her promising pro-tennis career. During her lengthy rehabilitation, she turned to the written word and fell in love with storytelling. She then spoke about how her former strict athletics regime has given her the consistent discipline to meet or better her writing deadlines. Now working extensively in the Marvel Comics world, she has some Black Panther spin-offs in the pipeline.

DDT miracle?

Once DDT was considered a miracle answer to the problem of dangerous insects. In the BSFA Lecture, Dr Sabine Clarke, a lecturer in modern history at the University of York, showed how DDT was used in 1946 in Kenya to control malaria.

In particular, she focused on a British propaganda film that

was used to persuade local people of the safety of spraying the chemical in and around their homes.

She found that their reluctance was probably not from ignorance but from their negative experience of the British applying arsenic to kill locusts, which had also accidentally poisoned cattle.

Complaints have been received from several sources – including Satellite Conventions’ Apocrypha Emeritus His Malevolence Fluff the Plush Cthulhu – about the non-availability of

memberships and con badges for apocrypha. He informs us that the Follycon Committee may expect to have their brains sucked out shortly!

Wi-fi saturated

Although the hotel assured us their internet provision was sufficient for a convention of this size, it's possible they weren't used to fans. All your tech devices are causing connectivity problems, meaning that other members can't log on. The Daily Drabble

This issue's drabble is a study from Charles Stross' laundryverse by Dr Adrian Emery:

An Investigation of the Physical Properties of the Basilisk and Other Litho-transformative Species

It had been previously reported in the literature that the Basilisk broke the law of mass conservation by converting carbon atoms to silicon via their gaze.

Extremely careful dissection of the eyes and visual cortex coupled with experiments using juvenile creatures on live subjects, it is now thought that a form of "warm" fusion occurs with a large release of energy.

It is thought that the visual cortex is acting as a quantum computer entangling a pair of atoms then forcing them into the same point of space creating silicon and energy. This is now been classified at ULTRA level.

Kim Stanley Robinson

A packed audience enjoyed a fascinating talk by Guest of Honour Kim Stanley Robinson.

He included many reminiscences of previous visits to Britain, including drinking and driving with Iain M Banks (though not at the same time obviously!) and answered audience questions about his work.

Feline Groovy

Scientists have come up with the purrfect way to write songs for cats.

The US researchers say their method will help moggies in feline the music. And in tests they found the cats preferred the species-appropriate music without a paws for thought.

This tail from the universities of Wisconsin and Maryland analysed the frequencies cats use to communicate and composed songs with them.

They even had a claws in their research to study how music affected other animals including dogs and gorillas; moloch gibbons apparently

have no interest in music.

Pet owners can litter their playlists with tunes to keep their whiskers twitching for all nine lives.

Eastercon 2020

There is no bid (yet!) for Eastercon 2020. However, a team are planning to bid at Ytterbium under the name *Concentric*. They are taking pre-supporting memberships at £20, which will count as £25 towards your membership. They are also looking for additional committee members. So run away now!!

On the Road to Recovery

As some of you may be aware, one of our members took ill last night and had to be taken to hospital by ambulance. He was kept in overnight for observation, but is fine and comfortable. The Con sends good wishes for a full and speedy recovery. Thanks to the hotel for dealing with the situation speedily and sympathetically.

The Daily Drabble: Application for Additional Funding?

Domestic Verification of EM-Drive Principles

Summary:

This experiment was attempting to utilise a domestic Microwave to assess propulsion potential of EM-Drive-style resonate cavity – with partial success.

Methodology:

Removing partial protective cladding from domestic Microwave to enhance propulsion surface, whilst measuring rate-of-transfer along kitchen work surface, resulting from meal preparation.

Result:

An average movement of 2.3 inches per meal resulted in the Microwave approaching the counter edge over 9 days.

Negative Side-Effects:

1. Consumption of large quantities of microwave meals.
2. Final measurements indeterminate as the Microwave was propelled over the counter edge

Consequences:

Additional funding needed to replace Microwave

Sandworm Folly Dance

At the Dance Studio, some Follycon members have been plotting a science-fiction themed dance, deciding that the theorised lifecycle of a Dune Sandworm (and Spice) deserved some TLC.

From solo dancers aerating the dancefloor-come-desert representing Sand Plankton, to pairs of dancers representing Sandtrout finding and then encapsulating water, plenty of stamping (spice blow), and the eventual musical development of one behemoth Sand Worm (and its embodied destruction), the "Sandworm's Folly" dance was born.

Full moves will be shared and called, but come along and practice on Sunday afternoon (1 pm), and possibly help write another dance or join in with the full Science Ceilidh band on the Sunday evening (9 pm).

Hay Lecture report

Climate change is a hoax. Its proponents are alarmists.

We have all heard these views, but Dr Kevin Cowtan from the University of York used this year's Hay Lecture to explain why people think like that even when the science is clear.

A lot of this comes down to scepticism, but he distinguished between two types of scepticism – real sceptics who are knowledge seeking and fake sceptics who are knowledge avoiding.

Fake sceptics reject science primarily for worldview and social reasons.

When trying to understand a scientific topic, he advised looking out for signs of bias and seeking out media that distinguish between real and fake scepticism.

Betty's Tea Rooms

1 Parliament St, Harrogate, HG1 01423 814070

The first floor Imperial Room is a trip back in time to a world of cake forks and

starched white aprons. The five course afternoon tea for £33 (£40 with champagne) is a classic selection of sandwiches, scones and cakes with a few contemporary twists like the pea, cucumber and tomato cocktail. There is an excellent range of teas and infusions available. The only real dilemma is whether the clotted cream or jam should go on the rose petal-infused scone first. They will refill the sandwich plate on your cake stand, although unfortunately not the plate of fancies. Phone ahead to book.
