Medallion Update

The pennies are pouring in!

D If Bloomington is south of Edina, what if you hang your hat in Minnetonka?

Likewise, the Bloomington room is south of the Edina room, and this medallion was in a wardrobe west of there. The prize, a card game about donuts, went to John Stanley.

2 This notched arrow is one of the farthest from the outside world; the notched arrow is formed by the negative space between two letters.

Found by Lisa Sanders and T.J. Neumiller, this penny was lurking between the E and X of the EXIT sign between the pool area and the Navigators club.

5 1411 31114 11 11 141 11311 13113311 318, 11 141 31111312, 11 141 31111111 213112 1111; The alphabet: 1332142418513113T11114484T.

Carol Kennedy cracked the alphabet code from the second clue. Kelly Strait figured out that the numbers assigned to each letter were taken from the tile values in Scrabble. Carol had already figured out part of the message, which, in its entirety, reads: "This penny is in the Super Scrabble box, in the scorepad, in the Consuite gaming area." Apologics for the typo replacing '13111313' with'31111312'. Once the hunters realized they were looking for a Super Scrabble set, the rest was easy. William Ketter and Jory Phillips actually retrieved the medallion and claimed the prize.

7 Peer behind the frame, not into the infinite hallway (where Medallion 0 should have been last year)

Found by John Stanley, this penny was behind the frame of the second floor hallway mirror closest to the lobby area, one of two pairs of large mirrors on opposite ends of the hall.

9 Push the button of the letters in the choice of a new generation; when you gotta have it, reach in and feel to the left...just be sure you're on the right floor!

Hidden in the dispenser slot of a Pepsi machine at the back of the 5th floor of the small tower. 'Pepsi' contains five letters. Found by Rob Ihinger.

Fun fact: one of the helpful strangers mentioned in the last edition was Mark Richards, last year's con chair.

Additional challenge: One dedicated treasure hunter found four medallions, but generously left three in the wild for others to find. Can you guess who that was?

Minicon Medallion Hunt

Ciues, Round Three

- 8. The key is simply to leave a winning combination of three numbers after each turn. The obvious winning combination is 0-0-0, and the others can be worked out backwards from there.
- 10. It's Dinotopian footprint code!
- 15. Minicon 43: This time, it's quaternary! (Better put all the clues together and hurry, folks—this penny expires at lam!)
- 20. The key here is the pennies that aren't dated 1973. They'll lead you to a new four-digit number! If you have one of these strange pennies, get together with others who have found them, or leave them at the BBT office for public inspection!

BBT Editor Falls Sanity Roll

Apparently driven mad by the incessant skittering of the tiny feet of Minicon Medallion treasure hunters. the BBT editor-in-chief used a picture of herself to fill up empty column inches at about 8pm Saturday night. She is expected to make a full recovery in time to put out a Sunday edition.

Corrections (Program Book)

Eric Coleman's name was misspelled in the program book and in the pocket program. We regret the error, but applaud our own consistency.

Cerrections (BBT)

In the story about the Australian Ambassador, "Zolo" should have been 2010. We regret the error, but do not take responsibility for it. When submitting hand-written copy, please try to write or print legibly, bearing in mind that the text may be deciphered by a bleary-eyed editor at 3am.
