Ask at the bar in rooms 226/227 overlooking the atrium.

POLICIES

Minicon occurs in a hotel, which is part of a city, county, state, and country. All rules and laws imposed by these larger entities apply, even though being at a con may make you feel out of this world.

Weapons: Prop weapons or costume pieces must be secured and pose no danger to others. We reserve the right to prohibit any such items from our function rooms.

Smoking: Minnesota is smokefree in all public places. Designated smoking areas are outside. Please direct specific questions to the hotel.

Help and Information: Ask at the registration/volunteers/info desk while they're open, or after hours at the consuite or bar. Also look for department heads or wandering con members.

VOLUNTEERING

Did you know that Minicon is an all-volunteer convention? We don't sell tickets, we offer memberships (priced to cover con expenses). As members of a community, we all pitch in and help out. It turns out that volunteering is also a great way to make new friends, connect with old ones, and generally have a great time at the convention. We'll have 1-2 hour volunteer shifts available (depending on the department), but will also have short one-off tasks like sign-making or errand-running. **Learn more at the Volunteers Table, conveniently located in the Registration area.**

We'll be trying something new this year, using the Discord message service as a way to contact Gofers, Badgers, and other volunteers in real time. If you want to join in this grand experiment, the Volunteers Desk Staff can help you sign up at the con. If you are familiar with Discord already, we'd love to have your help at the Volunteers table!

EMERGENCIES

In case of an emergency threatening life or limb, please call 911!

MINICON 54 CODE OF CONDUCT

Minn-stf acknowledges that interpersonal relationships in social settings are complex. Not everyone likes everyone else, and not everyone agrees with everyone else. Disagreements, friction, and vigorous debate are expected. However, interactions that become hostile or coercive do not have any part in a healthy social environment and Mnstf commits to addressing problem behaviors.

Harassment is difficult to define, and attempts at an exact definition are subject to rules-lawyering, so we won't attempt to do that. However, repeated unwelcome behaviors are mostly likely to be construed as harassment. If someone asks you not to touch them, not to talk to them, or not to refer to them in a way that they find objectionable, and you persist in doing so, you may be harassing them. Actions that are sufficiently egregious (assault, truly hateful language, and comparable actions) fall under this policy, even if only one occurrence has been noted. In the end, harassment is judged primarily by the person who feels harassed, and actions are more important than intent.

If you tell someone to stop something you see as harassing behavior and they don't, you may tell us. If you don't feel comfortable telling someone to stop harassing behaviour, you may also tell us. We want to make sure everyone is heard so that together we can make Minicon a healthy, fun, enjoyable experience for everyone.

**Code of Conduct Responders

HOW'S YOUR SQUEE?

Minicon is a place to get your squee on. It's a time for strange friends and friendly strangers, marvels and wonders, interesting conversations, fascinating objects, and lots of fun. Few things destroy fun faster than having someone not take "no" for an answer. Here's the thing: you have the right to say "no." No to a conversation, no to an activity, no to a beverage, no to anything that interferes with your own, personal squee. The ability to say yes to fun includes the ability to say no to not-fun. But sometimes...sometimes people don't respect your "no," and sometimes, you feel as if you can't say "no" directly to the person harshing your squee. In those cases, we will try to help.

If you need help with a problem where someone is violating our Code of Conduct (see opposite), or not taking your "no" for an answer, PLEASE feel free to call us at (612) 213-9620, and we will try to help. This phone is answered all day and most of the night. If we don't answer, leave a voice mail message, or text, and we will respond as soon as we can. We will work with you to find a solution that lets you go back to full-on squee.

Guest of Honor Author

NAOMI KRITZER

Bio written by Richard Snyder

An old school online denizen since back in the days of dial-up, Naomi has had a colorful and storied life. Over the years, she has played various musical instruments and lived amongst the denizens of a few foreign lands. Fables will rise over what was played

where and when. Her experiences of London and Nepal were no doubt rare and unique, as were her times here in the challenging northern climes of Minnesota. The texture and complexity she's absorbed come out in her work. She tells stories that are needed. We know this because others are telling stories about her stories. Nominations have been earned, awards have been accepted, and people have been thanked, all because of those stories. Now, a new adventure will be unfolding before us as Naomi joins us as our Guest of Honor. We will one day tell stories about Naomi telling us how to tell stories.

Naomi Kritzer has been writing science fiction and fantasy for twenty years. Her short story "Cat Pictures Please" won the 2016 Hugo and Locus Awards and was nominated for the Nebula Award. A collection of her short stories was released in 2017, and her YA novel, *Catfishing on Catnet* (based on "Cat Pictures Please") will be coming out from Tor Teen in August 2019. She lives in St. Paul, Minnesota with her spouse, two kids, and four cats. The number of cats is subject to change without notice.

DAVE DEVRIES

Bio written by Richard Snyder

Dave DeVries is an internationally recognized award winning illustrator. In 1998, after working for many genre specific clients, he created

his viral project, The Monster Engine, which asks the question, "What would a child's drawing look like if painted by a professional illustrator?" The results are startling transformations of flat childlike imagery into fully painted illustrations. You can find this at www.themonsterengine.com.

This technique came from his illustration work, primarily in the entertainment field—specifically the comic book, advertising, video game, and motion picture markets. Some of his clients include Dreamworks SKG, Lucasfilm, Universal Studios, Marvel and DC Comics and Warner Brothers Animation, among others. For this last client, Mr DeVries created concept art paintings that inspired scenes in Warner Brothers latest movie, *The Lego Movie 2*—in theaters since February.

In 2011, he was the recipient of 2 National Endowment for the Arts grants and has been featured in galleries and museums across the country.

During his career, Dave has held positions as a professor at Syracuse University, The Joe Kubert School of Cartoon and Graphic Art, The University of Hartford and currently at The Fashion Institute of Technology in NYC. He has also taught middle school and currently teaches digital art at Jefferson Township High School in NJ.

In addition to news, panel and party reviews, warm body updates, personals and other miscellany, there will probably be yet another Medallion Hunt. (Well, unless you lump that in with other miscellany.)

To write for the BBT: Come visit the office in Courttyard 4 and leave written submissions for upcoming issues—and while you're there, amuse yourself with our various distractions, puzzles and *objets d'art*. Or submit electronically to bbt@minicon54.mnsthf.org.

What resources can artists call upon if their work is being used without their permission?

SATURDAY 4/20 PROGRAMMING

8:30 PM **Artificial Intelligence Best Practices—What do AI's want?**

'OK Google, tell me why humans should be afraid of Artificial Intelligence.' In 1951, the year of the first rudimentary chess program and neural network, Alan Turing predicted that machines would 'outstrip our feeble powers' and 'take control.' In 1965, Turing's colleague Irving Good posited that devices more intelligent than humans could design devices more intelligent than themselves, ad infinitum: 'Thus the first ultraintelligent machine is the last invention that man need ever make, provided that the machine is docile enough to tell us how to keep it under control.'

What can we do to minimize the chances that our robots and computers turn against humanity or enslave us for our own good? Is it possible to create a free-willed intelligence that finds humanity likeable? What will Artificial Intelligence look like and what will it want?

A race to learn as much as possible about it culminated, on New Year's Day 2019, in an encounter between New Horizons and Kuiper Belt Object 2014 MU69. AFTER MINICON

See next page for information on the Dead Dog Party, Dessicated Dodo Party, the MNstf Picnic and other events taking place after Minicon.

Also, volunteers are always appreciated for tearing down and moving out!

WHAT IS MNSTF?

It's the Minnesota Science Fiction Society, abbreviated MnStf, MinnSTF, MN-STF, and other variants. It's the non-profit group that brings you Minicon. Each year, the MNStF board of directors approves the next Minicon chairperson and looks after the continuing needs of the convention. Minstf does more than just Minicon. It also runs a small convention each year in the fall, mainly for the purpose of having something like Minicon, but without all that pesky programming and stress. Ours changes name frequently. Besides running conventions, Minnstf's major activity is hosting social events through the year (officially known as "meetings"). Those events include a summer picnic, a pool party, and social events, often at members' homes. Meeting locations are published in MnstF's monthly newsletter Einblatt, Twitter and Facebook. The Einblatt is available at mnstf.org/einblatt. You can also sign up for our events and discussion mailing lists at mnstf.org. How do you become a member of MnStF? It's easy! If you ever attend a meeting, you're a member. If you sign in at seven meetings in a year, you become a voting member for that year and can help choose the Minn-Stf board.

DEAD DOG PARTY

The Dead Dog party is at the hotel Sunday night after teardown is complete. This is still part of the con!
All are welcome! *Bar, Consuite, and common areas.*

DESSICATED DODO PARTY

This is our second after party! We just can't stop.
All Minicon members are welcome. Mon, Apr 22, 6PM.

EINBLATT!

Einblatt! is the monthly events calendar of Minn-Stf. It attempts to inform people of conventions, meetings, and other fannish events taking place in or related to the Twin Cities fannish community. <http://mnstf.org/einblatt/>

THE MNSTF PICNIC

The summer Mnstf picnic will be Saturday, July 20, 2019, at Minnehaha Park, Picnic Area #2, Minneapolis (same place as the last several years). This event counts as a Minnstf meeting for purposes of voting eligibility. We have the location reserved for the entire day. Bill Christ plans to be there by 11:00am and start the grill as soon as someone wants it. It would be nice to have a few people show up early to help fend off the squatters.

The picnic will be held on the 50th anniversary of the Apollo 11 moon landing. Those of you who remember watching it please come and share your recollections with the rest of us.

CONVENTION COMMITTEE

The convention committee (or concom) are the people that organize and run the convention. Anybody can help out on the committee as long as you're willing to put in the work to put on a great convention. If you'd like to help, please email volunteers@minicon54.mnstf.org.

WHERE DOES THE MONEY GO?

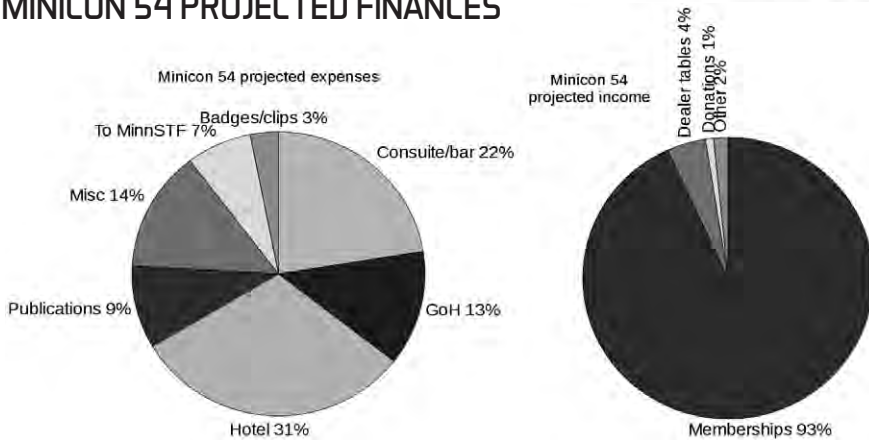

Minicon is a members-driven non-profit con. Our goal is to bring the community together for an enjoyable and possibly even educational experience, not to make the most money or to get the most people, although we take more people showing up as a good sign. We all chip in our membership fees so that there's enough to run this thing and to support our parent organization, Mnstf. If we end up with a profit after that, it means we overcharged. We make a concerted effort to hold the rates low and run a frugal con. We want you to know where your money goes, and we want to hear whether you think it's being spent well.

MINICON 53 FINANCES

Minicon 53 expenses came in under our estimates in several major areas. Somewhat offsetting this was an unusually high proportion of pre-registered members as compared to at-the-door, which lowers the income per member. (But do pre-register! It's much better for our planning (provided we know the proportions).) Overall, we netted well over our target, and are trying to shoot a little lower this year.
