SPOTLIGHT ON VIDEO GAME SPECIAL GUEST JON DAVIS

Jon Davis has spent the last 18 years as a programmer in the video game industry. He currently works for Respawn Entertainment as a member of the team that created one of 2014's most anticipated games, the sci-fi shooter Titanfall.

Starting with PilotWings 64, a launch title for the Nintendo 64, Jon has worked on a wide selection of video game genres across several well known franchises including EverQuest 2, Call of Duty: Modern Warfare 1 and Modern Warfare 2. He is comfortable handling anything from game design tools to dirty optimization hacks, but his religion changes from vi to Emacs and back again on a whim. True to stereotype, he considers caffeine to be a vitamin rather than an occasional stimulant. When he is not wrangling compilers, Jon enjoys melting glass, curing meat, experimenting with yeast and playing pretty much every game he can get his hands on.
