Friday

DIY Low-Tech Animation

Friday, 4:00 PM, Plaza VI (Six)

Before there was celluloid acetate, there were thaumatropes and zoetropes. Make your own short (very, very short) films.

Phillip Thorne (mod)

Want some SF? Get out of the SF section!

Friday, 5:00 PM, Crystal Ballroom Two

Science fiction, fantasy, and horror have moved out of the SF section of the bookstore. "Twilight" and "Harry Potter" are in the young adult sections. "World War Z" and "Soon I Will Be Invincible" are housed with mainstream fiction. And the romance section of your bookstore is FULL of tales of other worlds, other times, and monsters. What are some of the great things out there that aren't being marketed as SF?

Patricia M. Cryan (mod), Michael D'Ambrosio, David M. Axler, Stuart Jaffe

Doing a Lot of Costuming With Practically Nothing

Friday, 5:00 PM, Plaza V (Five)

A good early-con panel of general interest--How to use what you may have on hand for marvelous effects.

Donna Dube (mod), Lisa Ashton

Book vs. Movie - YA Edition

Friday, 5:00 PM, Plaza VI (Six)

Harry Potter, "Twilight," "Meatballs" and "Wild Things" -- among others. You read and then watched -- or vice-versa? What does each version gain or lose?

Deb Lieven (mod), Christine Norris, Greg Fishbone

Why Call It A "Singularity" If There Are So Many of Them?

Friday, 6:00 PM, Crystal Ballroom Two

The "Singularity" is a theoretical point in the future where something happens beyond which we cannot imagine what life will be like. Artificial intelligence, nanotechnology, virtual reality, and genetic engineering have all been suggested as possible triggers for this supposed future event. But is the singularity even feasible, and if so, will it be in a form that we can even recognize?

John Ashmead (mod), Tom Doyle, Christopher Weuve, Catherine Asaro

What is SF Costuming & Why Do We Care About It?

Friday, 6:00 PM, Plaza V (Five)

A good Friday evening panel to attract a lot of fans interested in costuming of all kinds, both experienced costumers and others.

Byron Connell (mod), Tina Connell, Toni Lay, Lisa Ashton

Digging Dinos for Kids

Friday, 6:00 PM, Plaza VI (Six)

You've returned from the fossil beds of deepest Mongolia to your university; now carefully extract and assemble the fossils hidden within each sample.

Deb Lieven (mod), Rebecca Marcus

How to Build a Time Machine

Friday, 7:00 PM, Crystal Ballroom Three

Time travel is one of the essential ingredients in compelling science fiction. Given that we've never built a time machine, how do we separate the "science" from the "fiction?" The authors of "A User's Guide to the Universe: Surviving the Perils of Black Holes, Time Paradoxes, and Quantum Uncertainty" will give you the physics perspective on this. They'll describe how to build a practical time machine and what you can do with it once you're done. Following a short talk, the session will be open to general questions and discussion on the science of time travel.

David Goldberg (mod), Jeff Blomquist

Can You Repeat That Mr. President? My Twitter Feed Was Down.

Friday, 7:00 PM, Crystal Ballroom Two

We're living the future. Information distribution is instantaneous, and so are everyone's opinions. Panelists discuss how new ways of distributing information are changing the face of journalism.

Catherine Asaro (mod), J.R. Blackwell, Laura Anne Gilman, Andre Lieven

Danielle Ackley-McPhail Reading

Friday, 7:00 PM, Executive Suite 623

Danielle Ackley-McPhail Reading

Danielle Ackley-McPhail (mod)

MMO Nation

Friday, 7:00 PM, Executive Suite 823

Massive Multi-player Online games are one of the largest entertainment industries today. Games like World of Warcraft, Star Wars Galaxies, and City of Heroes have changed the way we look at gaming. What will we be seeing next?

Phil Kahn (mod), Jay Wile, Robert Hranek, Kristyn Souder

Fantasy Based on Non-European Sources

Friday, 7:00 PM, Plaza I (One)

You don't have to go "all medieval on me" to write fantasy. What are the best examples of fantasy not based on European backgrounds to date?

Victoria Janssen (mod), Stephanie Burke, James L. Cambias, Christine Norris, Tom Doyle

Friday

Think small.

Our little runabout isn't so much of a novelty any more.

Policemen don't try to squeeze inside it.

The World's Greatest Temp doesn't ask what makes it run.

Nobody ever stares at our shape.

In fact, some people who drive

our little flivver don't even think traveling across time and space is going any great guns.

Or rescuing Shakespeare and Dickens.

Or hauling half a dozen planets with a cable to save the Universe.

That's because once you get used to some of our economies,

you won't even think about them anymore.

Except when you alter the time flow and create a temporal paradox.

Or pay a small repair bill. Or trade your old TARDIS in for a new one.

Think it over.

What Makes a Webcomic Last?

Friday, 7:00 PM, Plaza II (Two)

Why do some webcomics last and last? How do the creators of webcomics keep them fresh.

Rob Balder (mod), Tony DiGerolamo, Jon Kilgannon, Ruth Lampi, J. Andrew World

A Science Fiction Curriculum For New Comers

Friday, 7:00 PM, Plaza III (Three)

Science Fiction authors list the core books and concepts for an understanding of the Science Fiction genre.

Michael J. Walsh (mod), Walter Hunt, Ted Rickles, Gail Z. Martin, Michael Swanwick

Frivolous Uses Of High Technology

Friday, 7:00 PM, Plaza IV (Four)

When it becomes possible for a conceptual artist to turn the Moon into a gigantic smiley face, no doubt someone will. When we can change our shape or gender on a whim, what are par-

ents to do when it becomes a fad for kids to have tentacles?
What will be the frivolous face of technological change?

Tom Purdom (mod), James Daniel Ross, Ariel Cini, Eric Kotani

The Science of Zombies

Friday, 7:00 PM, Plaza V (Five)

Are there any scientifically plausible theories for reanimation?

Ty Drago (mod), D.E. Christman, Jonathan Maberry, Michael D. Pederson, James Prego

Best Animated Movie of 2009

Friday, 7:00 PM, Plaza VI (Six)

The year's not over yet, but compare the contenders: stop-motion ("Coraline"), traditional 2D ("Ponyo"), or CGI (most everything else)? Drama, humor, or the SF easter eggs of "Cloudy with a Chance of Meatballs"?

Deb Lieven (mod), Walter Amos, Robert Fenelon, Brian T. Price

Making the Unreal Real: Illustrating things that don't exist.

Friday, 7:00 PM, Plaza VII (Seven)

How do you illustrate something you can't get a reference for; from hardware and spaceships to monsters and magical powers.

Alan Beck (mod), N. Taylor Blanchard, Robert Kauffmann, Frank Wu, Karl Kofoed, Thomas Nackid

Is Hydrogen the Future of Energy?

Friday, 8:00 PM, Crystal Ballroom Three

There's been a lot of discussion of hydrogen as the post-fossil-fuel solution for energy. Hydrogen fuel cells could one day power homes, cars and factories. But there are still many technical and economic challenges, such as production and distribution of hydrogen, to be overcome. Will we achieve a hydrogen economy? Should we? Are there better solutions?

Walter Hunt (mod), Frank O'Brien, Robert Hranek, John Moore, Charles E. Gannon

The Lasting Appeal of Dick (Philip K., That Is)

Friday, 8:00 PM, Crystal Ballroom Two

The predecessors of Philip K. Dick. Dick was not the first author to turn your brain into a pretzel. A discussion of the writers who influenced him.

Diane Weinstein (mod), Nick Wolven, David Louis Edelman, J. Andrew World

Apocalypse Pretty Soon?

Friday, 8:00 PM, Plaza III (Three)

Mega-Tsunamis smashing into the East Coast of the US. Supervolcanos under Yellowstone. And there's always that asteroid with our name on it. What kind of massive disasters can we expect, either in the near or far future, and what can we do about them?

David Silverman (mod), JJ Brannon, Michael D. Pederson, Gail Z. Martin

You Never Forget Your First Doctor...

Friday, 8:00 PM, Plaza IV (Four)

The mantle of Dr. Who is soon going to fall on a new actor... the ELEVENTH to play the good Doctor. What are some of the great Dr. Who moments? How does new Who compare to the Old School? And where should it go from here?

Tina Blanco-Finan (mod), Patricia M. Cryan, Wayne Zimmerman, Nikki Cohen, Terri Osborne, Andrew C. Ely

The Music of the Fantastic

Friday, 8:00 PM, Plaza V (Five)

When most people think about music and SF, they think of the theme from Star Trek, or Darth Vader's March. But music and SF have been intertwined from the beginning. From Jeff Wynne's "War Of The Worlds" to the steampunk music of Abney Park, find out how these two art forms have related to each other through their histories.

Catherine Asaro (mod), Crystal Paul, Roberta Rogow, Steve Vertlieb

Free Build with LEGO Bricks

Deb Lieven (mod), Marilyn Brahen, Richard Stout, Gregory Frost

The Future of Money

Friday, 9:00 PM, Plaza II (Two)

How has personal finances been portrayed in the past in Science Fiction and how will it be portrayed in the future? Will there be such a thing as money in the future?

Ray Ridenour (mod), Tony DiGerolamo, Nina Ely

Hot Alien Sex

Friday, 9:00 PM, Plaza IV (Four)

How do aliens do it? Use imagination.

Phil Kahn (mod), Muriel Hykes, James Daniel Ross, Oz Drummond, Camille Anthony, Jonathan Wright

Friday

This Blood's for You

Friday, 9:00 PM, Plaza VI (Six)

Season Two has just ended of *True Blood*, the HBO adaptation of the Southern Vampire series by Charlaine Harris. For the most part they've kept to the main story arcs but they've added so much to the show it's like watching something new! What are some of our favorite moments from the show? Things that we could seriously do without? Do you love the additions, or do they make you wanna do bad things to the screen writers?

Emily Tullis (mod), Jonathan Maberry, Dusti Lewars, Terri Osborne

ZOMGWTFBQQ! Come and hang out with your fellow LJers, DWers, FBers, Tweeters, and any other *ers we haven't thought of yet at Philcon! Hopefully this year we'll be able to answer the age-old question...Is there anyone here who's NOT on Hugh's friends list?

Hugh Casey (mod)

These Are A Few Of My Favorite Scenes

Friday, 10:00 PM, Plaza I (One)

Remember that show with that guy who did that thing? You know, with that...thing he had? Take a look at some of our fondest anime-induced memories. Who knows? You just might find a new favorite of your own.

Robert Fenelon (mod), Walter Amos, Stephanie Burke, Joe Foering, Amy Howard Wilson, Brian T. Price

Why Science Fiction Is Not Finished

Friday, 10:00 PM, Plaza II (Two)

A French critic was recently quoted as saying, "Science fiction, well, it is finished." Some say science fiction is purely a Baby Boomer phenomenon now heading demographically toward its sunset. We at Philcon have a different view. This panel aims to list as many reasons as possible why science fiction is not finished.

Alexis Gilliland (mod), Walter Hunt, Darrell Schweitzer, Charles E. Gannon

MMO 101 – WoW, EVE, Everquest, and Beyond!

Friday, 10:00 PM, Plaza III (Three)

From Quests for meaning in World of Warcraft to helping shape the universe of EVEonline, how to get the most out of your Massively Multiplayer Online experience. Whether your interest is as a player, parent, or concerned significant other, this panel will introduce you to MMOs, why we love them so much, and the perils of becoming an MMO addict.

Robert Hranek (mod), David Moore, Michael Ryan, Tim Souder

We Started This Cult Film S***!

Friday, 10:00 PM, Plaza IV (Four)

Everybody, everybody's heard of REPO! The Genetic Opera. No? Well don't be shy! Our panelists will do a little testifying for you. Abandoned by Lionsgate Films it took a grassroots movement by the cast and the fans to advertise the movie. Now REPO! is being called the next Rocky Horror Picture Show, with midnight viewings, shadow casts, and audience partici...pation. Now the first film company to turn them down for production is wrapping up a movie with an eerily similar plot and a blockbuster budget

Genevieve Iseult Eldredge (mod), Samatha Kwait, Dusti Lewars, Christopher Stout

SF & Fantasy Cartoons And Why We Love Them

Saturday, 10:00 AM, Plaza I (One)

What's new out there this year and what should go back to the drawing board...literally! Do we just love our old favorites from years gone by, or do we like the new stuff? These questions and other serious topics will be tackled. (e.g.: Exactly what the heck is a Scooby Snack?!)

Robert Fenelon (mod), Tony Finan, Walter Amos, Kimberly Ann Kindya, Brian T. Price

MMO 201 – World of Warcraft, The Gold Standard of Fantasy MMORPGs

Saturday, 10:00 AM, Plaza II (Two)

Dominating over half of a multi-billion dollar market with its 11.5 million players, Blizzard's World of Warcraft had to have its own panel☺. Details on all aspects of WoW are up for grabs: choosing a race, class, and profession; leveling your character; choosing a guild; performing quests; auctioning items; PvE vs PvP; performing raids; and managing your RL (Real Life!) time.

Robert Hranek (mod), Phil Kahn, David Moore, Jay Wile

The Value of Art: Traditional vs. Digital Media

Saturday, 10:00 AM, Plaza III (Three)

How does an artist set prices for their art? Should a one of a kind oil painting cost more than a digital piece that took the same amount of time to make? Do buyers understand the value of art?

Ray Ridenour (mod), Kyle Cassidy, Luke Stelmaszek, Alan Beck, Thomas Nackid

The New Feudalism

Saturday, 10:00 AM, Plaza IV (Four)

Why does there seem to be very little Science Fiction about labor unions in the future? Is this a good or bad thing? What will industry look like in the future?

Tom Doyle (mod), Gail Z. Martin, Stuart Jaffe

Costume Workshop: Fabric Flowers

Saturday, 10:00 AM, Plaza V (Five)

The Fannish Generation Gap

Saturday, 11:00 AM, Executive Suite 823

These kids, with their anime and their steampunk! They're ruining our con! And those old farts, with their beanies and weird inside jokes that they don't explain, are making us feel really unwelcome! It seems like the long-time battle of the old vs. the young is still going strong in fandom. Is there any way to bridge the gap?

Michael D. Pederson (mod), Samatha Kwait, David M. Axler, Patricia M. Cryan, Tobias Cabral

Saturday

VS.

Saturday, 11:00 AM, Grand Ballroom A

“**Tweet-O-Log** is a real ‘space age’ marvel, which enables my colleagues and I to interface with our families and friends during our twenty months in cryogenic hypersleep. The 140-character limit is perfectly suited to the eight-minute delay in sending our **Tweet-O-Log** signals to and from Earth, and to our diminished capacity and metabolic rates as well. With a small adjustment in our syntax and pacing we can exchange plans and ideas almost as well as we could if we were awake on Discovery. I especially enjoy interfacing directly with our HAL 9000 computer via **Tweet-O-Log**, and have stimulating conversations with my colleagues.”

Diversity in SF and Fandom

Saturday, 1:00 PM, Crystal Ballroom Two

RaceFAIL'09. MammothFAIL. The Open Source Boob Project. SF writers, editors, and fans publicly commenting on race, faith, or sexual issues that other find offensive. Lately it seems that issues about racism, sexism, and other types of prejudice have exploded all over professional SF and its fandom. Is fandom rife with bigotry? Or are people being too sensitive or making something out of nothing? Or is the truth somewhere in between? And, maybe most importantly, is it even POSSIBLE to have a civil conversation about any of this? Well, we're going to give it a try. Wish us luck. (Note: this panel will fill a 2 hour block. The panelists and moderator will discuss with each other well in advance how best to handle the sensitive topics that will probably surface during this discussion.)

Paranoid Science Fiction

Saturday, 8:00 PM, Plaza II (Two)

Philip K. Dick immediately comes to mind, as an author obsessed with the idea that reality is not what it seems and that they are very likely out to get us. But the theme has been with us for a very long time. Think of Fred Pohl's "The Tunnel Under the World" or Heinlein's "They" or Harness's THE PARADOX MEN. Inevitably the "paranoid delusion" proves to be anything but. Is this merely delusional or is it a clearer perception of the nature of reality?

Y, Syfy? Y?

Sunday, 10:00 AM, Plaza VII (Seven)

We stood by them when they gave us Mansquito. We kept watching when they added WWE wrestling. And then they said "The name Sci Fi has been associated with geeks and dysfunctional, antisocial boys in their basements..." and changed their name to Syfy. And yet we still return to watch shows like Warehouse 13, Eureka and Sanctuary. Do they know us better than we know ourselves?

The United States In A Thousand Years

Sunday, 11:00 AM, Grand Ballroom A

If you go to any of the older cities of Europe, you will see buildings that have been inhabited for a thousand years or more and adapted to modern purposes. We think of medieval Tuscan hill towns with TV aerials on the roofs and motorcycles driving up the narrow streets where no car could ever go. We see medieval rearrangements of ancient Roman leftovers of even more ancient (such as an Egyptian obelisk) which the Caesars swiped for their own purposes. Try to imagine what New York or Philadelphia will be like when they are old enough that you can see this "layer cake effect" of history right before your eyes.

My Cartoon Stereotypes Are More Offensive Than Yours

Sunday, 11:00 AM, Plaza I (One)

Bored with the tired cliches of American storytelling? Where does a cultural reference cross the line into stereotype? Ever catch yourself asking "Hey! I'm American, but why do all these "westerners" have blonde hair and blue eyes? And why do "Asians" in American cartoons keep saying "honor" in every sentence?"

Towards a Theory of Quantum Gravity

Sunday, 12:00 PM, Crystal Ballroom Three

Modern physics has two fundamental models of reality - Quantum mechanics and general relativity. The first describes the world of fundamental particles, the second explains gravity in terms of warped space time. A theory of quantum gravity would unite these two models and finally bring gravity into the unified field theory, along with the other three fundamental forces. The current leading contender is string theory, but there are others, such as loop quantum gravity, supergravity and noncommutative geometry. Which, if any, of these theories will prove to be the answer?

The Biology of Obesity

Sunday, 12:00 PM, Plaza I (One)

Obesity is a growing problem around the world, and increasing research has revealed the causes to be much more complex than just "eating too much." Medicine now recognizes that some people will gain more fat from the same amount of calories than others. Hormones, gut bacteria, brown fat, neurotransmitters, metabolic pathways, viral infections, circadian rhythms and many other factors are all now implicated in weight gain and loss. Are we closer to understanding the causes of and solutions to the obesity epidemic?

Hollywood Goes Green! Wait, They're Remaking What?!

Sunday, 12:00 PM, Plaza IV (Four)

Yeah we all know that asteroid was a potato, that doesn't mean they need to re-shoot the entire movie 30 years later! Hollywood is on an updating rampage, everything from "The Pris-

oner" to "The Smurfs" is scheduled for 21st century makeover. My childhood is rolling in it's grave. And that not even mentioning everything they've already gotten their "artistic license" on! Panelist will discuss the influence the modern world has on the various TV shows and movies we have grown up with and whether the "modernization" was for the better. Do the remakes make the grade?

Beyond The Nation State

Sunday, 2:00 PM, Plaza III (Three)

We have a bad habit in science fiction of assuming that our basic social patterns will last forever. There was a time -- many times, in many eras of the past -- when the nation state as we know it simply did not exist. In feudal times, loyalties were to persons. The ancient empires were often completely "international" and inter-tribal, but they could be ordained and run by a priest-king who was regarded as a living god. These ideas have passed away. How will societies be organized when the "nation" is as obsolete as a Egyptian pharaoh?

The Future of Print Genre Magazines

Sunday, 3:00 PM, Crystal Ballroom Three

The major print magazines have suffered a large loss of circulation and many smaller magazines have gone out of business

INTERNATIONAL BEST SELLING AUTHOR JOGBERD LINKANDON BRINGS A WHOLE NEW UNIVERSE OF WEREWOLF ROMANCE HORROR!

For centuries, a truce has existed between the Lykains, proud shape-changers who prey upon the living, and the Necrothrope Empire, the Unliving who feed upon mortals. Cailer, an ambitious Lykain/Necrothrope half-breed, has demanded the supremacy of his kin and the complete destruction of his bloodline. The House of Silverpelt must choose a path that could trap humankind between two fates... as nourishment for the Necrothropes or as food for the Lykains.

"Jogberd Linkandon has found an approach to werewolves, vampires, romance and terror that is utterly original and without precedent."

Caryn DeFibrillay, *The Weyrwulf Legends*

"The sultry growl of the werewolf, the icy blood-red gaze of the vampire... never before has an author charged these with such sheer erotic power."

John Normal, Consultant of Nor

"Only an Act of God could prevent Jogberd Linkandon from delivering his next novel."

Adam Parfait, *Ambiguous Reviews Monthly*

The Stories That Changed Everything

Sunday, 3:00 PM, Plaza IV (Four)

How many science fiction or fantasy stories truly changed the field? What effect did they have? What stories or books have had this effect? We might suggest, *A PRINCESS OF MARS*, "A Martian Odyssey," "The Call of Cthulhu," *THE LORD OF THE RINGS*, and *NEUROMANCER* as examples. Is this sort of transformative change something an author can set out to do on his or her own or does it just happen? Do conditions have to be right or does a great story MAKE the conditions right. (Think of this as The Great Story theory of science fiction.)

SEE THE EXCITING WORLD OF DINOSAURS

Sinclair DINOLAND

Dramatic, life-size replicas of nine different types of dinosaurs are shown in this fascinating and educational Sinclair Refining Company exhibit, located in the Transportation Section of the Fair.

A re-enactment of life on earth as it was some 60 million to 180 million years ago, the Sinclair exhibit

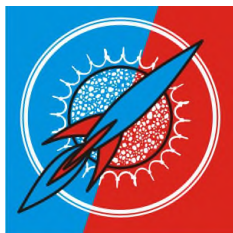

is as life-like and authentic as modern science and painstaking research can make it. You'll see the 70-foot Brontosaurus, one of the largest land creatures that ever lived... giant Tyrannosaurus, the most ferocious flesh-eater of all time... Ankylosaurus, the "walking fortress" plus other awesome dinosaurs, so realistic they look alive!

Sinclair PETROLEUM PRODUCTS
RETAILED EXCLUSIVELY AT THE FAIR

For the convenience of all Fair visitors who come by car, Sinclair Service Stations, located at both of the Fair parking lots, will offer expert service and top quality Sinclair Products.
