

# Jingles of Hubbard Link Past, Present Processes

How far Scientology and Dianetics parallel each other, and whether all the techniques of one have been made obsolete by the other, are questions that have aroused much controversy in the Dianetics-Scientology fields. This schism, in some instances, has resulted in a complete break between those who look upon Dianetics as decadent, and those who have obtained results with the old techniques and consider Scientology a weird upstart.

Persons who have read L. Ron Hubbard writings and have listened to his lectures recall that--no matter what magical properties he may ascribe to a new technique--he always has advised that the auditor is concerned with the case, and not the process. Auditors still report that they are getting results with Book One methods; others who have been in the field since the beginning--back in 1950-- admit they use both old and new techniques, depending on what they think the pre-clear needs. The difference, they say, is that the new techniques work faster, but there are times when the old techniques must be used before the pre-clear can accept the new. These auditors seem to be the ones reporting the best and most consistent results.

Below is printed a copy of "The Dianetic Jingles" written by Mr. Hubbard when he first moved to Phoenix in March, 1952. These are particularly interesting because of their broad scope, covering, in brief form, almost every technique from those in "DIANETICS, The Modern Science of Mental Health", to the Beingness Process of 1954. To those who like to work with riddles, it might be much more profitable to look for next year's Scientology in these Jingles than to waste time looking for the hidden meanings and significances in the "Jingles of Nostradamus". (Not that we're pointing out a similarity.)

In a Precede to the "Jingles", Mr. Hubbard wrote: "If you can decipher these, you'll know everything there is to know."

## AUDITORIALS

HAVE WE A Following Issue 2  
FAITH? OR of The ABERREE, cor-  
A SCIENCE? respondence indicates  
there has been some  
tendency in the field to believe  
we are antagonistic toward Dianet-  
ics and/or Scientology. Nothing  
was further from our purpose.

After three years of investi-  
gation into L. Ron Hubbard's sci-  
ence--following more than 15 years'  
research into religion, mysticism,  
psychology, and allied fields--we  
are convinced Scientology comes  
closer to answering our questions  
about ourselves and life than any-  
thing we've ever found. In this  
lifetime, at least. To us, it has  
become a way of living, and unless  
something comes along to supplant  
it, we shall continue to use and  
endorse Scientology and the major-  
ity of Mr. Hubbard's books on the  
subject.

Any opposition we have expres-  
sed or expect to express is con-  
cerned wholly with false, bombast-  
ic claims about the science, eith-  
er in whole or in part. As a re-

ligion, we feel that Scientology  
comes closer to explaining the  
where-what-and-why of man than any  
other creed or dogma. As a thera-  
py, we have seen it produce re-  
sults neither the medical profess-  
ion nor so-called prayer-and-faith  
cults have been able to touch. But  
it's not the ultimate. Not yet.

We sincerely believe that  
claims any technique will cure  
anything from ingrown toenails to  
baldness to a cold in five minutes  
to five hours are not only false  
but are unfair to Scientology it-  
self. These claims not only in-  
validate the preclar, but the  
auditor trying to use them. When  
promised results are not obtained  
within promised limits, the audi-  
tor--no matter how well trained  
and sincere--believes he has failed.  
He approaches his next case with  
less certainty, and, eventually,  
is no better off than the doctor  
who knows he can do nothing, but  
needs the money, and "anyway, it  
was good research". Some continue  
taking training courses as long as  
they can afford it; others drop  
out of Scientology altogether, and  
the field has lost a friend and  
follower.

As long as we're operating in  
the MEST Universe, we're going to  
~~have to~~ conform to MEST acceptance  
levels (unless we can develop suf-  
ficient power to demonstrate total  
cause). It's one thing to put out  
a "mock-up" and say results are  
possible rapidly, and another to  
prove it so others will be con-  
vinced. A blind, undying faith  
just isn't going to get the job  
done.

SHOULD WE. It won't be the same  
RETURN TO Air Force (with no K.P.  
"MERCEN- and no "spuds" to peel  
ARIES"? for personnel under  
punishment), if an ex-  
periment now being tried at Vance  
Air Base in Oklahoma works out.

Some brilliant brass hat (prob-  
ably with an engram from his priv-  
atcy) conceived the idea of let-

## Link All Techniques

(Here's Where Page 1 Quit)

Anything you shun will have won.  
 Anything you have done you can.  
 Anything that is work is a shirk.  
 Anything you desire means expire.  
 If you ever need bait just create.

Informal Sketch  
 of L. Ron Hubbard

Anything you can take, you can make.  
 If emotion comes, use and win.  
 If emotion you won't use, you will lose.  
 If a motion comes in, that's a sin.  
 If motion from you flows, the world blows.  
 If beauty you desire, beauty transpire.  
 If tone is to soar, create even more.

If you don't want the real, always feel.  
 If you want the whole sky, never buy.  
 If you don't want remorse, just be source.  
 If you want to be tall, just be all.  
 If you ever repent, you are spent.  
 If you act in today, you keep morrow away.  
 If you act in the past, you won't last.  
 If you say you aren't God, you are sod.  
 If you have to be liked, you are spiked.  
 If you choose to agree, you're a

tree.  
 If you want others' gain, you're insane.  
 If all things you eschew, they are glue.  
 If your body you'd leave, don't believe.  
 The way out of MEST ain't detest.  
 If you'd soar to the blue, just go through.  
 If all things you would flee, these you'll be.  
 If you want to destroy, just annoy.  
 If you just want to heal, make him real.  
 Whatever is cause to it everything draws.  
 Whatever is wrecked, was effect.  
 If high tone shun the low, the suns brighter glow.  
 When high tone fights entheta, he comes in very later.  
 Entheta is just matter kicking up a final splatter.  
 If your MEST's in disorder, your case is on the border.  
 If your MEST is in good shape, you haven't time to hate.  
 If all things you would create, you'd better be in time and date.  
 If through others' thoughts you plow, you will come at last to mow.  
 If you don't want to be attacked, don't draw back.  
 If all evil you'd burn down, simply up and build a town.  
 There is no trick to being unless you spend your time agreeing.  
 If you don't have a datum, create 'em.  
 The only unknowns are in other men's domes.  
 The real universe is a hearse.  
 The right way to be is to be.  
 When aesthetics are sex, they've been wrecks.  
 If you want to be pure, don't endure.  
 If you want to last, just move fast.  
 If all things you'd deserve, don't preserve.  
 If the world's all your brother, you're just another.  
 Those who gave us mystics were sadistics. (Turn Page)

No wise man should stammer because he hasn't grammar.  
 If you would overrate it, just let it make you rate it.  
 The bottom of disease is anxiety to please.  
 You can blame your confusion on the fact you bought illusion.  
 The always last sung song: "I was wrong".  
 You'll never climb a steeple if you worry about people.  
 If you can't bring yourself killing, you're just another willing.  
 Just because it made you fall, doesn't prove that it is all.  
 If you get caught in the middle, it's because you've bought a riddle.  
 If you want things in delirium, just get serium.  
 If the engrams you'd keep in, study hard to know of sin.  
 If you want an empty larder, just tell yourself "work harder".  
 If your vision is all blurry, you've got another's worry.  
 If you want to be enchained, let some other buy your brains.  
 If some other's race you'd fall, just pretend you aren't all.  
 If you find yourself well under, it's because you defined blunder.  
 The entire source of pain is an effort to abstain.  
 A calm and peaceful mind has refused to put trouble behind.  
 A really sharp obsession is from lack of self-confession.  
 If you want to really let it, forget it.  
 If you want to get real tragic, forget it was just magic.  
 If you really want the stutters, respect the rights of others.  
 If you want to be tearful, be careful.  
 The only reason some people find ambition is a spike, if they don't try to be, they try to be like.  
 If you're awfully deject, you're defect.

-eøe-

Don't forget the Conference in Phoenix June 5 to 9. (And L.Ron's "latest" won't be all that's hot.)

## PERSONALS

Sorry, PINKHAMSKI. After we'd deciphered your article (?), on the A-bomb, we were out of patience, and when we'd audited our patience back, we were out of room. Try it on The GHOST; it'll print anything. (Well, almost anything.)

To RAY SCHARPEN--Thanks. Now that we're back under the green eyeshade, we feel less like a house without a roof.

To BROTHER ART in Fort Worth--Don't start worrying about what's happening to the "Family Tree". Alice Agnes Johnson Hart and Clem Johnson are not cousins, even if you did read it in The GHOST.

To RON--Hope you didn't think we'd print that, even if it did come from our favorite California grapevine.

-eøe-

### FOUR RECEIVE CERTIFICATES

Four certificates, entitling the owners to practice Scientology as a religion, have been received in California from L. Ron Hubbard's office, according to J. Burton Farber, state executive secretary of the Church of Scientology of California. These were: Doctor of Divinity certificates to Rev. John McCormick of LaJolla, and Dr. Farber, Glendale; and Practitioner of Spiritual Healing certificates to Earl H. Robinson, South Pasadena, and George H. Schuler, Long Beach.

### NOTES ON THE DOCTORATE COURSE

190 pages of data that took eight weeks to gather, three weeks to compile and write, and two weeks to print. Where else can you get so much for so little? Better hurry. The next-to-last one will be \$25. (We're keeping the last one for ourselves.)

ALPHIA HART

200 N. Washington Enid, Oklahoma.

# The Spinescent Evolution of a Clem Out of Water! Ghost Goes "Saintly"; Blames Past Blunders To Editor of Aberree

After reading Clem Johnson's February issue of The GHOST, dated April 15, we turned back to Page 1 to see if he'd renamed the "magazine" the "GHOST OF DANIEL WEBSTER". But he hadn't, so we guess our friend from Florida isn't running a past life in locking horns with the Devil and trying to best him with his wit and oratory.

To those who get The GHOST and don't read it (The GHOST editor apparently doesn't, because he sent our copy airmail from his address in Phoenix to our old address in Phoenix, although our new address was printed inside), you'll find more in the February-April issue about The ABERREE and its personnel than you'll find in The ABERREE. Of course, very little of it is reliable, but we enjoyed finding out what the hot Arizona desert can do to a man used to captaining a rowboat off the hurricane-swept Florida coast.

Just to keep our readers informed (those who read both The GHOST and The ABERREE), we're going to quote The GHOST at length, and make any corrections in his article we feel necessary. Minor errors will be ignored:

"Our old friend, staunch and true, tried and tested and found to be all we had mocked him up to be, and more--Devil Hart himself. has now turned on us with a brand new Scientological news sheet (1)

called The ABERREE in which he blasts everything and every one with more vim and vigor than the Ghost ever dared to do!

"In Vol. 1, No. 1, he very covertly calls the Ghost a 1.1 publication without being brave enough to call the name--and he calls US 1.1!

"Actually though, if you knew the Devil before he attended the Clinical Course Third Unit--(and 4th) you would know how apathetic he was to being quoted (2)--or was it fear, 1.0? Anyway, he claims that his auditing through the two courses have done nothing for him, he has come up tone to 2.2 anyway and is now just about the most ANTAGONISTIC person in the field. SO THERE IS A CHANGE whether he will admit it or not!! (3)

"Just because he claimed that he was a "Black 5" (4) and insisted on staying one, he became very antagonistic towards all the Theta Clears (5) and Operating Thetans (6) that were produced in the 3rd and 4th Units...So antagonistic indeed, that he couldn't find people enough to LISTEN to him so he has to start a newspaper! (7)...."

"....Ron says there were NINE theta clears made during the Fourth Unit. This is probably so, although they DO NOT go around admitting it. And you need not pay much attention to what you read about it in the Aberree, either,

because The Devil is very proud of being aberrated, and especially of being considered a Black 5. He thinks that Black 5s are the only SANE people there are! And it does seem that they are according to (Turn Page, If You Want More.)

"We will try to get it (The GHOST) back on a more 'saintly' level."

THIS society!

"By the way, there is a place over in Oklahoma called Enid--if you can imagine a town with such a name--must have come from the Bible (8), anyway, in this burg (9) along about 207 North Washington, a dark dingy little alley (10) is door called THE DEVIL'S WORK SHOP, (11) and in this place you can get all sorts of letter work, such as threatening letters to your wife or the president, written, signed and mailed for you at a price (12) Also this is where you may obtain a copy or subscription to THE ABERREE. Phoenix had a cleanup campaign here a week or so ago, and cops raided all the blind tigers and other 'dens of iniquity' (13) so Mr. Devil Hart had to move back to Oklahoma where everyone remembers him as a very sweet and charming child of 1½ months of age, that's about the time he left there! He has now gone back for the first time since he left there in a covered wagon with his folks for the gold rush in California in 1849...

"...We promise, now with a good clean air, we will try to get it (The Ghost) back on a more 'saintly' level, like it was before its contamination with Satan..."

(There's a lot more; but if you want it all, write Capt. Dr. Rev. Editor Clem Johnson, D.D., B.Sc., Psycho-analyst--or he will be as soon as he finds some pre-clears to miracle--at 3521 East Camelback to send you The GHOST. It doesn't cost anything--just a letter once in awhile to ease his loneliness--and this is quite reasonable, even if the price were double. We like The GHOST; before reading it, we didn't know how much one could get away with.)

But now to straighten up SOME of the confusion the preceding

quotations may have left you in:

(1)--We seen our duty and we done it. Somebody had to get out a Scientological news sheet.

(2)--We weren't apathetic to being quoted; we were just particular about who quoted us.

(3)--We'll agree we're antagonistic, but deny this is a change. There was a time, in 1952-1953, when Ron himself evaluated us at 4.0.

(We Can't Stop Now. See Page 7)

"In a dark dingy little alley is a door called The Devil's Work Shop."

## "The Ghost" Goes "Saintly"!

(Continued from Page 6.)

(4)--Denied. We think, according to the SOP 8 assessment, we're a Step 3, but we'll admit more of a kinship toward the "Black 5's" than some of the Step 1's we've known.

(5)--Name one.

(6)--Name one.

(7)--All who believe this MAY find an auditor willing to work on a psychotic.

(8)--Enid is "dine" spelled backwards ('tis said) because pioneers and cowboys found the mineral springs an excellent place to camp and eat.

(9)--Population, 36,017, which

is 120 times larger than Boca Grand, Fla., population 300.

(10)--See drawing of this "dark, dingy alley" on Page 6.

(11)--That's quite a label, Pal. Did you think that up all by yourself?

(12)--We'd even write for or edit The GHOST, "at a price".

(13)--They didn't get them all, apparently--or were their raids confined only to the city limits?

And now, to more important and serious business--with a warning to those who believe The GHOST's statement The ABERREE is \$1.67 for three years. It's \$1.68 A year, so if you're disappointed, just send a bill to The GHOST for the difference.

## A Dichotomy of Valor

by Trah Nika

Those pioneers of '49,  
(That's 1800, understand),  
Just thought it hard to cross a  
space  
That now is called "Vacation  
Land".  
There may have been a massacre  
Along the unmarked trails they  
trod,  
But if they kept their powder dry,  
The rest was in the hands of  
God.

Now let us skip a hundred years--  
When Hubbard's Book One knocked  
'em dead.  
Outside of paying tax on tax,  
"There's nothing wrong with us,"  
we said.  
In childish innocence we laid  
Our heads upon a bed or cot  
And let the File Clerk give us all  
The spicy data we'd forgot.

(Oh, Mother, aren't you ashamed  
Of all you did to little me?  
Does Papa know that Doctor Moe  
Was getting more than just his  
fee?)  
We writhed with fever, howled with  
pain,  
And while we wept at our af-  
fliction,  
The auditor sat back and snored

Or lost himself in science-fiction.

The "science" grew, and we who  
stayed  
Learned of our wild, sadistic  
wake;  
We found that those we'd killed  
and maimed  
Gave us our present bellyache.  
We'd raided planets, trapped its  
men,  
And used their bodies for re-  
search.  
(You'd hardly think that, would  
you, of  
A former pillar in the church?)

So, if you're prone to shed a tear  
For those who raped the virgin  
west,  
Remember, they died long before  
We roused the engram from its  
nest.  
They didn't have to probe the sun,  
Or find the moon had nothing on  
it.  
They didn't even have to be  
Three feet behind their coon-  
skin bonnet.

--eØe--

HOW TO FIND THE MISSING PAGES  
If this is a "Sample Copy",  
several pages probably are miss-  
ing. These will be sent free to  
each new subscriber to The ABER-  
REE.

Erratum: When Scientology came to Oklahoma, Paul Ishmael gave up his yearning to be a physicist and move to the California desert, as reported last month...Add erratum: The Belknap-Hedley organization isn't the "Antidiseestablishmentaeianisticalitarianism Unit" as reported last month; it's the "Antidiseestablishmentarianisticalitarianism Unit". We regret the error...When Earl Cunard, lately of Detroit, came from his home in Creascent, Okla., to visit us at our trailer, he left his friend in the car. It seems she knew little of Scientology and nothing of "The Devil", and Earl wasn't taking any chances of fouling up his future...

Bill Young of Washington writes from Phoenix that it's getting hot there--108 degrees already. Stick around awhile, Bill. That's only a Spring thaw....Hardin Walsh sent us a sketched heading for the May issue of The ABERREE and it so closely approximated the one we'd already used that the Mesdames Hart and Walsh are getting suspicious as to which thetan isn't staying put. Of course, Hardin's (sketch) had no horns, and it was more professional...We got a long, 7-page letter from Bob Arentz in SaltLake, which wound up with "Not for publication in The Aberree". We guess he meant the whole letter but he might have meant just those six words....Bob Williams, writing in The COMMUNICATOR, finds we, as civilized creatures, are depriving the body of much needed "caressing, friendly nuzzling and hugging and kissing", and has formulated a technique of "rubbing, squeezing, pressing" various members of the

body for long periods. He titles his article "I Make Love to Their Feet". But don't start getting any panting ideas--that he's against...

His teaching job, we hear, has given up Jack Horner, and he's in Phoenix, Ariz., again, on a more or less permanent basis.....The "Perpetual Student", who took the 2nd, 3rd, 4th, and 5th Clinical Courses with the avowed intention of making "theta clear" even if it takes his lifetime, is reported to have had some processing from "The Maestro" himself. Result: for a few moments, he thought of trading his student status for a job, but recovered, and was back in class next day...Volney Mathison reports a 500 percent laboratory expansion to take care of a \$87,000 order for E-meters by a Texas institute, which plans an intensive nation-wide campaign to train doctors in use of the instrument. It may get to the point where you can go to a doctor and get helped yet...Clem Johnson, according to late advices, is studying road maps for the return trip east from Phoenix--at least as far as Mobile, Ala., through New Orleans. "Duch" has finished her training course with Ross Lamoreaux, and is probably aching to try her sword against some of those more able engrams that never find their way into the Arizona desert...Ival Mainard, of Elgin, Ill., driving a new car for delivery to a dealer in Phonyx, stopped in Enid on his way to the 6th Clinical Course. He reports formation of a Church of Scientology is nearing the completion stage in Illinois...."This will keep the thetan in", Elizabeth Williams pens in a note enclosed with a real Scotch red-and-black beret mailed us from London, England. Thank you, Elizabeth, but if it ever gets out, we'd planned on wrapping it in paper--not wool.

-oøe-

ANOTHER CRUCIFIXION, MAYBE  
Civilization started 70 centuries ago. Whatever became of it?--  
Hobbs (N.M.) News-Sun.

# NEWS from PHONYX

By Carroll Hennick

## 1--MARITAL (and SEMI-MARITAL):

Tam Owen of London and Bonnie Turner have announced their engagement. Wedding to be some time this summer. She is now blond and quite feminine.

John Sanborne and Madeline Regan also are to marry this summer. She came to Phoenix from Boston and has been attending the group meetings.

## 2--WHERE PEOPLE LIVE:

Both Dick and Ronna Steves and Bob and Tido Churchill are living in house-type apartments on the corner of Third Street and Moreland.

Burke and Millen Belknap have bought a new house--spacious place near Thomas and Third Street--and have moved into it.

Henrietta and Nibs (Ron Jr.) also have changed their home nest in the last few weeks.

(Unsolicited comment--Scientologists usually either are marrying, unmarried, or moving. Added evidence: this reporter is buying a house and moving into it next month.)

## 3--PEOPLE GOING PLACES:

Bud Eubank and Carl Harr left Phoenix and returned to the hinterlands.

Bill Young (Washington, D. C., pro. auditor) is in town for a few weeks, getting some processing by Ken Barrett and Ralph Swanson, and picking up some recent data.

Bob Churchill went to Utah for a few days to attend the funeral of his mother.

## 4--WHAT PEOPLE ARE DOING:

The local group has had an el-

ection and change of officers. President: Bill Edwards; Program director: ME. Last week's meeting was in the Library Sky Room and featured a talk by Millen Belknap on the evolution of Scientology, philosophies, and religions of the last 5,000 years. This type of program planned every other week, with group processing on alternate weeks.

Most local pro. auditors have formed a group known as the Phoenix Auditor's Guild. Steves and Fred Frank supply most of the leadership, with Jim Struckmeyer and Ralph Swanson contributing. Big project at present is scheduling bi-weekly lectures by local civic leaders on topics they are interested in which Scientology covers. This is followed by a forum in which Scientologists and the guest lecturer participate. First of this series was by Judge Lorna Lockwood on juvenile delinquency.

Ralph Swanson and Ken Barrett are running a free clinic for children under the HAS.

## 5--RON'S LATEST:

Ron planned a series of 15-minute taped talks over a local radio station, but after the manager of the one station that agreed to use them heard the first tape, he became highly unfavorable to the whole idea. (The talk reminded people that they might perhaps have some present time problems, and mentioned that there was something that could be done about it.) Present plans are to give a series of spot announcements over another station.

OVER  
THE

## EDITOR'S SHOULDER

"It's good to see a high-tone communication making its appearance in the field...I enjoyed your editorial on the 'Clear'. There are many parameters by which one can measure a relative state of 'clear'. I believe that the most indicative is the percent of potential present time operation of the thetan. This, tone level, vitality of the thetan in terms of the 'spiral' are quantities that are measurably increased by processing."--C.B.Done, Durango, Colo.

"Even if I had \$1500, I wouldn't have to send it to you for your list of reasons. (Why we left Phoenix. Ed.) I can mock them up from here...I am working on a processing book for children. These are short sessions of mock-ups which parents can read to children.

"Perhaps you would like to reprint my definitions of clear, from my book. 'Clear (verb). To sweep away problems and confusion and leave the mind tranquil and able. Clear (noun). An individual whose confusions have been swept away to such a degree that the remaining ones are no longer discernible to his contemporaries or to himself."--Richard deMille, Ph.D., Los Angeles, Calif.

"Thanks for your paper. Yes, it is high time we adopted a more bleak and austere outlook on Scientology. Let us take things literally and seriously and let us

look forward to the day when this gradient scale leads on to the downright sinister. Who ever heard a serious student laugh at the HAS? And who ever saw a graduate about to face a simplified world look other than as if he were under sentence of death? Having blown vast sums in dollars, yen, taels--or, for that matter, pounds sterling--to acquire this solemn knowledge, why invalidate it? Time will hang heavily with me until the first Church of American Science is built here and I can decently confess before some High Unctorial Blablab of Scientology that for an erring moment I allowed my frosty mask to slip and that I found your paper funny."--Reg Gould, London, England.

"We've had fun with your news letter and found the detailed write-up on the church useful in giving people the data on that move. So far we feel not at all religious--or at least no more religious than scientific or philosophical, so we are as before.... Don't know whether we'll subscribe to your sheet or not--I won't! Already I could have written another book in the time it takes me to throw away the sucker list ads and papers I don't want to read...."--Martha Curtis, Ann Arbor, Mich.

"We all got quite a charge from the 'Aberree'. I keep it on my desk and show it to everyone.... Hardin says, 'The Aberree's brilliance is only shaded by the green shading of its antidotes!' My tone goes up to 400 on the new meter after reading the 'Aberree'."--Jonna Walsh, Los Angeles.

"Thanks for the advice on the tapes....That 56 bucks was the best money I ever spent...Incidentally, I shall be forever skeptical of Ron's jokes from now on. You remember that in one of the sessions he begins with 'Now if the auditors throughout the audience will ready their butterfly nets, we will begin'? I thought that was a joke,

until I had the occasion occur... At the end of that session, one of the group definitely was not in present time. I began reality processing and she promptly left for some place, God knows where, but the body was in the deepest unconsciousness, falling temperature and very slow heart. Fortunately the latest Scientology issue containing the article on emotional processing, emphasizing unconsciousness, had arrived that day and been studied carefully. I set my guidons and went to work. This happened at about 11 at night and it was 3 in the morning before I got her back. Fortunately, the thetan did not refuse communication...When I got her back, she said she could hear me and knew she was doing as I told her but that her own determinism was completely paralyzed. I worked her again the next night for three hours mocking up present time alertness and unconsciousness and pulling in the anchor points until all that remained was a mild dizziness when working unconsciousness. She returned to present time quickly at the end of the session and felt wonderful...It was validation for the technique, validation and a great leap in her case for her, and for me a wonderful validation to be able to handle a situation of that magnitude in a thoroughly competent manner... It advanced my case as well as hers."  
--Gladys Hale, Pierre, S.Dak.

"I've liked your sensauma since the days of J-HAS, Phoenix. Incidentally, the Journal made a quick round trip via Phila. & Camden. Next stop?... No need for me to advise you that you will not make from this publishing venture enough \$\$\$ to endow a foundation, or even so much as an "American Hart Association"... And would you mind stapling them in only one place, the North-West Corner diagonally? I had to remove the bottom staple from mine so the pages would turn over neatly.. (Free staple remover with each 10-year subscription. Ed.)

....I guess that will be enough, only Don't Get Too Seriously. Clem was good until he took it to heart."--F.C.Henderson, New York.

"Am now sending Clem his subscription for the Ghost, so that I will have complete coverage on the forthcoming battle of great wit."  
--Ethel Adler, Beverly Hills, Cal.

"Inclosed you will find a check ....for that scandle sheet you put out. I am having a ball with Unit V."--Nibs. (L. Ron Hubbard., Jr.,) Phoenix, Ariz.

"Apparently, my name is not on your black list, for I received no copy of your puerile, Pyrronic, pugnacious, Punic, and perfidious publication... Quit being so \*1#\*-damn painfully brilliant." --Will Roth, Houston, Texas.

"When we last talked I thought you were in the negative swing but had no idea you were going to make an issue out of it. I do not think that the Hubbard organization is in order, however, Hubbard has done so much for me that no one had been able to do before. Therefore, I must praise the bridge that has done so much for me and will go along with his ideas hoping for the best." --Dr. P. D. Napier, Lockhart, Fla.

"Thanks for the taste. If you've another subscriber on the Island (or nearby mainland) introduce us; because I feel odd, being the only known (to me) crackpot in the County." --John Carey, Atlantic City, N.J. (Sounds like an open welcome to other "crackpots" in this area.)

"I brought my identification with Dianetics and Scientology to an abrupt halt in the early part of 1953 because I was disgusted with a large number of the people all trying to make money off one another, and attitudes that I, for some aberrated reason, didn't want to continue to associ- (TURN PAGE)

ate with. So, my wife and I, taking Hubbard's advice, went out and built our own house--METACHROMICS.

"About the Aberree. It's a swell job and I like its tones-- for it has several, and I don't like to get stuck reading page after page of something in the same tone."--Morgan J. Morey, Tampa, Fla.

"It looks as if this --- competitor of a scandal sheet is determined to persist. So, I'll stop resisting and send in my subscription....I want you to know that I think youse guys are just horrible for entering your splinter publication into the already overcrowded field of Scientological and other readers. There are yet so few cases who can look, that I think this is a real infringement and should be prosecuted to the limit of the law--whatever that is."--Barbara Bryan, Phoenix, Ariz.

"We received the second issue of 'The Aberree' and read both the first and second issue at the same time....We both enjoyed them and would certainly like to be on the mailing list....Lots of good luck and please keep the line open."--Marianna Adams, Kansas City, Mo.

"Received your ? and would like to receive more. But, I don't like the amount requested and have changed it to .97 plus .03 sales tacks. Enclosed find \$5."--Leo R. Hoemel, Detroit.

"I ... particularly enjoyed the tone scale as published and as compiled by Hennick. I had thought ... quite a bit about the tone scale especially in relation to the minus scale. It seems to me that some of the minus characteristics actually belong to the thetan's scale between 0 and 4. Such as controlling bodies, protecting bodies, needing bodies. In other words, the tone scale comes down from 40. Right through the thetan plus body scale to minus 8 or minus 12. It seems to me the thetan can have a scale of his own in the

same range as the thetan plus body which will not be the same. I feel that there are lots of thetans operating bodies from this range and are not the high drive type that kick a body around. Perhaps the thetan's tone scale will be the same as the body's but it seems that controlling bodies would be higher than being a body."--Lt. Col. Alvin E. Robinson, Washington, D. C.

"Just finished scanning The Aberree for the third time in case I missed a "sleeper". I enjoyed it hugely. I so enjoyed it I have read excerpts, "Gems", to friends.

"My own activity has been rather sporadic. I am stopped practically. A new cycle is looming, tho, and hope is still breathing."--Bill Winters, Long Beach, Calif.

"The Aberree was the best job I've seen in the field in the last four years. I am terrifically pleased and real proud of you... I'm enclosing evidence that advertising in The Aberree really pays off."--Ross Lamoreaux, Phoenix.

"Sure enjoyed your paper. It compares favorable in tone with those who sometimes get quite low on the tone scale.... Glad you liked part of my writeup enough to reprint it. It has been criticised because it is too erudite. People have to read it more than once, sometimes--not like the funny papers."--Frank Sullivan, Detroit, Mich.

"My unbiased opinion is that it (THE ABERREE) is equal to The Ghost. I MEST (pronounced 'must') have it."--Al Ramirez, Silverdale, Wash.

"In reference to 'Aberree', Vol. 1, No. 2, I also know very few 'Clears', but I didn't know the definition was so indefinite. It seemed pretty precise to me in the Appositions of Scientology by Awful Hard. And, by these precise definitions, there is at least one

'Cleared Theta Clear' in Peoria--a very good friend of mine. This fellow is real fun to be around, and isn't busy impressing others or posing in mysterious manners to convince people that 'I know a secret--and for money I will tell'--as some of the early 'Clears (?)' seem to have done. I 'interviewed' him recently and sent the tape to Gordon Beckstead, so you may get to hear it sometime.

"We had a good time at the Processing Party on May 1, and later on, if people are willing, I will collect some 'statements of results' pro, con, or non.

"By the way, we are offering a new degree: C.C., S.O.T. The C.C. is an English degree: Certified Clear; the S.O.T. is Slightly Operating Thetan. Send in the top off one Uncertified Clear and \$1,000,000.08 and we will consider you for these degrees."-- R. John Bloomquist, Peoria, Ill.

"...Not everyone has your capacity for punishment. Not everyone would have invested three years in training, and then settled down to making a living shuffling papers and cracking jokes. Please do not misunderstand: I do the same thing, for it pays me, as it pays you, and THE OTHER DOES NOT. That is the crux of the difficulty. WHY DOESN'T IT PAY. As a mutual friend remarked the other day, 'I like dianetics and have had a lot of wonderful results with it. But I NEED my present job and would hate like hell at this stage to be obliged to make a living just from Scientology.' In a town of 150,000 with HIM the only known Scientologist! ... I verily believe that the answers to our problems lie in MORE information from MORE sources--more of the time."--Lee Lockhart, Albuquerque.

"Aberree has me spellbound. I have nothing to offer but encouragement and the enclosed check. There's only one over-all improvement I could wish for which would be reflected in the letters to the

editor column: I'd like to see more people madder quicker--and mad enough to write in and rave." --Bill Bradner, Winter Park, Fla.

"Your fanzine, 'The ABERREE', is to hand, and it is typical of fanzines, including the 'humor'...As you-all fanz. eds. never guarantee continuance or refund on folding, I never risk \*\*\*."--Harry B. Moore, New Orleans, La.

"Long time twixt communiques. Received the second copy of The Aberree and enjoyed it so much (your personal touch) that I decided to spring and subscribe...I went into a spin a few months ago. Wowee. Think I am relatively stable again. Woweeeee....There is a question in my mind as to the benefits of Scientology when carried to some of the higher statuses such as theta clears and cleared theta clears. The lower level benefits such as curing and correcting mental defects is fine and beneficial. However, when it comes to making clears (beyond the definition of MEST clears), it seems to me in light of my understanding and experience that there are potential dangers of bringing people into the range of psychic control." --Joseph R. Zubris, Dorchester, Mass.

"Glad to see you in print again. Another Aberree."--Kathleen Monroe, Tampa, Fla.

"I think it is nice to have someone putting out a magazine that is so straightforward and outspoken. It certainly counteracts some of the vaporously optimistic publications one gets from other sources."--D.C.King, Denver

"Please start my subscription with Vol. 1, No. 1, if you ever get around to starting the publication."--Pat Conroy, Los Angeles.

(To Be Continued. And though we like flattery, we'll print other types of comment here, as well.)

## GLOBI- CIDES

Sen. McCarthy--not the same wooden-headed dummy Edgar Bergen operates--was in high dudgeon recently when he learned the Army had used one of his own tricks: monitored a telephone conversation with him. McCarthy (not the same, etc.) called it "indecent and dishonest".

Denmark's getting tired of Americans coming there for sex operations--men who want to become females, and vice versa--and plans a law to make it illegal.

Prison officials at Canon City, Colo., sentenced a prisoner to a bread-and-water diet as punishment for escaping. However, during his five days' absence, he'd starved himself to the point they have to fatten him before they can carry out the sentence.

More and more pitted windshields are turning up all over the U. S., and an Ohio scientist has found them to be radioactive. H-bomb plasters still insist the recent Pacific tests can't be responsible, and it has been suggested that flea eggs, laid in the sand from which the windshield glass was made, may be hatching on a mass basis.

Development of a silicon battery that creates electricity from sunlight--enough, possibly, to operate a modern home--has been announced by Bell Laboratories. Quantity production may make them cheap enough to operate an ordin-

ary flashlight. Only rival: the atomic battery, which can produce only on-millionth of a watt. U.S. subsidization being what it is, and it being such a pleasure to play with atomic fission, this may be the last we'll hear of the sunlight battery. It would be too much like the economical Chlorella, an economical way of feeding the world from the sun and sea.

Wives of 1,000 construction workers in Columbia Falls, Mont., who refuse to cross a picket line, have suggested they take over the jobs their husbands have left idle. To them, food is more important than some small group's row with the firm that pays the bills.

Because Los Angeles protects pigeons, a 65-year-old tenant---forbidden by law from killing or molesting "city property" --moved out when a mother pigeon took over a corner of his room for nesting activities. He sent the City a bill for the extra rent.

Grave diggers in Detroit have ended a seven-month strike, permitting the interment of an accumulated 200 bodies.

Prompted by past experience, Enid, Okla., officials made it illegal to carry or use "pistols designed to discharge liquids". This action was taken a few days prior to the invasion of school children for the Tri-State Band Festival.

Chicago is to set up a laboratory for "crazy drivers", and "logical suspects" will lose their licenses UNTIL psychiatrists can report a cure. Which sounds like a good way to take everybody permanently off the road.

An Air Force lieutenant, because he wanted his son born on Texas soil, had a bucket of Texas earth shipped to Reno, Nev., and spread under his wife's delivery room table. This will not show on the birth certificate.

## Officers Elected By New Michigan Church

The Detroit Center, which a little more than a year ago found its Dianetic activity in headlines and two of its leaders under legal purge, has tucked its frustration under its wings and marshalled its forces behind a new corporation: the Church of American Science.

By-laws for the corporation are similar to those under which the church first was organized by L. Ron Hubbard under New Jersey laws. Michigan is the fourth state to so organize, following New Jersey, Arizona, and California. Action has been initiated in Illinois.

The organization is sponsored by more than 40 members, and at a recent meeting, the following board of directors was elected:

Harold Penny, chairman of the Church and president of the board.

Refa Postel, recording secretary.

Frank Sullivan, treasurer.

Ernest Wirick, corresponding secretary.

Leo Hoemel, board of education.

Don Abbott and Duane Lurkins, members.

A two-story building has been obtained in Berkley, Oakland County, which is 10 miles from the outskirts of Detroit. The three large rooms on the first floor are being used as an assembly room, a library, and a study room. Four smaller rooms on the second floor are for auditing.

In the spacious yard is a playground for children. Plans are to hold Sunday School on Sunday mornings for the processing of children.

According to Wirick, both tape and personal group auditing will be available for two hours each on Monday, Wednesday, and Friday evenings. About 20 are attending these sessions, and as the Church membership expands, session schedules will be adjusted, Wirick says.

More than 75 persons were present for the Open House April 24 and 25.

## HOW DEADLY IS T-V?

Are the rays that bring Cowboy Dan and his frontier pistol more deadly to you and your children than to the Indians on the screen? Is Dangerous Dick a lethal foe to the Marys, Johns, and Bills being entertained?

It would be inconvenient, and costly, to wear lead shields every time you or your family sat down to watch the latest television epic. It might even get to the point where you'd prefer a good book, or the old-fashioned radio, for your home entertainment.

Tests have not been completed as to the efficacy of this protection, but preliminary experiments suggest that copies of The ABERREE, properly placed between you and the screen, may reduce materially the perils of radiation. Try it today; buy several extra copies and be safe.

## The ABERREE

On sale at all GOOD news stands. If YOUR dealer doesn't sell The ABERREE, ask him about his television stock. His answer may surprise you.

*"Original Thesis" Is Printed  
Complete in H.A.S. "Journal"*

Issue 28-G of the Journal of SCIENTOLOGY carried a full reprint of the book, "Dianetics, the Original Thesis", under the title, "Scientology: A New Science". This should interest newcomers to Scientology as well as "old timers" who "look down their noses" at Dianeticists as "foreigners" and consider them bedfellows of doctors, psychiatrists, etc. This issue of the Journal contains 20 pages and sells for 75 cents, compared to the \$3 charged for the original book.

And this might be a good place to explain what the "G" stands for after the issue number of the Journal. Originally, there were supposed to be three classes of the magazine: Medical, designated by the letter "M" and carrying material of interest to the medical profession; Special, symbolized by the letter "S", which would go to special groups; and General, which would cover the entire field of Dianetics and Scientology. The "M" and "S" numbers would be sample "come on" issued, and those who showed enough interest to subscribe would be picked up on the "G" list. The "M" and "S" issues never have materialized.

**SHOULD WE RETURN TO 'MERCENARIES'?**

(Here's Where Page 2 Ended.)

ting the contract to a civilian organization to provide meals for this training center. Not only will they furnish the meals, but there'll be civilian service for officers AND enlisted men, with no dishes to wash, no floors to scrub, no sloppy tables to "G.I."

It's an economy measure. It was discovered that an outside firm could provide better meals at less expense than the Air Base itself. Which merely points up the inefficiency of a military organization. With hundreds of men idle most of the time, serving out a sentence in preparation for a war the top politicians may not be able

to maneuver us into in spite of their frantic efforts, it seems strange that cooks, waiters, dish washers, etc., can be hired, food prepared and served--at a profit for some civilian firm--cheaper than the Government can do it.

Yet there have been parallel instances in the past. On Operation Crossroads, the Bikini atomic bomb experiments of 1946, more than \$100,000,000 was spent to detonate and photograph two atomic bombs. A better job could have been done for one-tenth of this sum by even one of the "B" picture companies from Hollywood. It was no secret among military personnel that the pictures made by the Army Air Force of the A-blasts in 1946 and the preparations for it were far inferior to pre-explosion pictures made by a newsreel company.

In the name of economy--if the administration REALLY is interested in lightening the tax burden--maybe somebody will come up with the idea of fighting the next war by contract: give the contract to win the war to a low-bidding civilian firm and let them make the plans and hire needed personnel. It's certain experienced gunners wouldn't be pounding typewriters, typists picking up twigs and cigarette butts off the grass in the "Officers' Quarters", and cooks and dish washers operating the armament.

Besides, if it were a game as well as a job--instead of enforced servitude under incompetent rank-happies--winning a war might be fun.

-eøe-

**SICK ITUR AD ASTRA**

"A hypochondriac", according to Will Roth in The FLITTER, "is a fellow who can't leave well enough alone. He has also been called a person with a sick sense."

-eøe-

A "Rev." Braxton B. Sawyer, who calls himself an "Anti-nudist evangelist", seeks laws in Oklahoma, Kansas, Missouri, and Arkansas to outlaw nudism, which he admits does not now exist. Anyone know a better way to make nudism popular?

**FOUNDER OF 'NEW' SCIENCE LABELS  
BELIEF IN PAST LIVES AS 'INSANE'**

Taking up four pages in DIANOTES, a weird hodge-podge of worship over "dead" techniques, Art Coulter, M. D. (NOT Mad at Dianetics), terms "the notion that one is a Thetan, able at will to separate from one's body", or experience knowledge of past lives, schizophrenia and hallucination. If, he says, "one begins to believe these things, one is flirting with one's sanity."

"M. D." Coulter, in a sort of postscript to his attack on Scientology, announces that he is discontinuing his "informal relationship with the Dianetic Foundation" (Wichita, Kas.) to function independently in the development of a NEW science which he tentatively has labeled "Synergetics".

"M. D." Coulter will do his research in Columbus, Ohio, which is close to Cincinnati, which is where people go to earn degrees they admit they've been using prematurely.

...THERE'S STILL HOPE FOR YOU. You'll like our air--outside or in--and one of our training or auditing programs may open an entire new future for you.

Ask for Bulletin PMQ. It's so new, the ink still smears on it. But it's free.

PHOENIX SCIENTOLOGY INSTITUTE

4248 N.32nd St. Phoenix, Ariz.

**YOU CAN'T LIE  
and Get Away With It!!**

Is your wife true to you?  
Did your husband win, or lose,  
when he played poker with the  
"important business deal from  
out of town" last night?  
Who broke the bathroom window?  
Did you ever elope to Mars with  
a blue beauty from Venus?

In the hands of a skilled operator, the Mathison Lie Detector (called "Electropsychometer" to confuse those impressed by long words) will detect a lie, even if you THINK you're telling the truth.

If you're an auditor, you waste your time and your preclear's (for which the poor P-C may be paying) by not using this electronic assistant.

The HM-4 is the old stand-by, and sells for \$89.50. You can order through The ABERREE, or direct from

**Volney G. Mathison**  
1214 West 30th Street  
Los Angeles 7, Calif.

Tell him you read it in The ABERREE. You'll get a 1-inch longer electric cord, if you do.

BLOWING OUR RIDGES!

HARDIN WALSH says that he would like to clamber out on a long theta limb and predict that Duplication is SCIENTOLOGY's secret weapon - and - that L. RON will develop some tree-e-e-e-mendous super colossal engram eliminators along these lines. We've done some experimental work on this but RON and ONLY RON is the RON to give us the way down below, and above, duplicities of DUPLICATION. What we need is more DUPLICATION OF: GOOD AUDITORS - GOOD AUDITING - GOOD AUDITORS - GOOD AUDITING - JOANNA - GOOD AUDITORS - GOOD AUDITING - MONEY - GOOD P. C.'s - JOANNA - GOOD AUDITORS - and LRH.....AND OLD DEVIL AORTA.

Would certainly recommend "CERT-AINTY". The H. A. S. of London will accept your order. The most information for the least money, in magazine form. All schools and groups should stock extra copies to sell and give away. Gives information about Scientology in industry - schools - the professions, etc. Practical well written processing suggestions. Let's all write these high-toned English Scientologists our vote of thanks!

## IMPORTANT ANNOUNCEMENT -

AN ENTIRELY NEW METHOD FOR SUCCESSFUL SELF PROCESSING - -

Since our first tentative announcements we have received many letters asking "How soon will they be ready?" Here's our answer:

Due to the high cost of printing, at present we just do not have the money to publish them without help - so we are offering you a part in this project.

FOR JUST 30 DAYS we are offering the set at a pre-publication reduced price of \$2.50. These cards do no good to anyone while they are laying around on sheets of paper gathering dust.

WE KNOW THEIR VALUE! SO DO YOU! In order to make them available right away, when they are greatly needed, we are making this offer.

The SIX STEPS was chosen because it is a basic security technique. With this new system of auditing cards, the Six Steps become an even stronger tool for clearing. The Six Steps, in themselves, make a complete processing plan, and is an unlimited technique. A person using them for only 1/2 hr. each day will find himself going steadily up scale, and maintaining a constant high tone. It is designed to extrovert and stabilize a person and thus enable him to enjoy good health, well being, and ultimate clearing. With the card auditing system it is impossible to overlook any part of this important material. Handling the cards furnish a constant method for remaining in present time. Even persons who have been completely unable to process themselves report that this card system has cleared up that problem.

The regular retail price for this set of 208 cards and instruction booklet will be --- \$3.00, plus tax in Calif. FOR JUST 30 DAYS we are offering this special so we can get them in print. \$2.50. Process out the time lag - SEND YOUR ORDER IN TODAY. Additional discount to groups or quantity buyers of 20% for five or more sets.

*Scientologically*  
*Joanna*
