There were a total of 10+10+8+10+9+12+7=66 commands, so the next 6 pseudo-random numbers [henceforth abbreviated perms], namely #2160-2165, are discarded. The Austrian orders required modification, since seven units were ordered to attack Serbia. Thus, one of the units (an Army from Trieste) was selected, using perm #2166, and its command was changed from Attack to Support. The modified orders are given above.

The resulting situation follows; for information on how things got that way, see the other side of the page.†
