## LINKING PHENOMENA ABOVE ON BELOW EARTH

VOL. 2 NO. 7

ASSISTANT EDITOR JOHN J. ROBINSON

12 ISSUES \$2.00

### SID PADRICK CONTACT STORY

(Continued from Previous Issue)

WAS THE SPACEMAN MORE OF A RELIGIOUS LEADER THAN A SCIENTIST?:

I wouldn't even classify him as a scientific person. It's obvious that they are on a very high scientific level, but -- their relation with the Supreme Being means a lot more to them than their technical & scientific ability & knowledge. I would say that their religion & their science are all in one.

RE TIME & DISTANCE:

He told me they do not measure time & distance as we know it, but rather in terms of LIGHT. When I asked him how fast they travelled thru space, he answered that their speed was limited only by the speed at which they could transfer their energy source. He said this craft I was on was not propelled by its own power source, but rather thru a power transmitted to them - on a light beam, or on a light source known to them.

WILL THEY CONTACT GOV'T OFFICIALS?:

No, I think they'll first BY-PASS the Gov't officials -- from what he said to me. They don't WANT to make contact with Gov't officials right now. I shouldn't say Gov't in particular -- I should say the MILITARY. I asked him if he had ever tried to establish contact with our Gov't or Military & he said, "No." I said, "Would you like to?" & he said, "No." So I said, "Could I be of assistance to you in establishing contact?" & he said, "No!" They he said, "Your nation -- & all nations -- will attack an unknown object for purposes of destruction, without cause." What he meant by the words "without cause" was this: they do not come here ARMED ever -- & we have no reason to attack & destroy them. But our attitude is: shoot down anything you can't identify.

ARE ANY OF THE UFO'S HOSTILE?:

I have been told -- by the Air Force & other people making studies of this -- that there are unfriendly crafts coming here; but I was not told that by the spaceman. He told me that this craft I was on had never been fired upon, but the Navigation Craft had. I asked him if it had been actually engaged in combat and he said, "Yes, but not to destroy" -- not to destroy ours. I got the impression, from the way he said it,

that we are more vulnerable to them than they are to us. I don't think they are worried the least bit about us knocking them down. He made no mention about being afraid of us.

HOW COULD WE MAKE CONTACT WITH THEM?:

It is not up to us to make contact with them -- it's up to them to make contact with us, because we have no control over them. I asked him if I could communicate with them, since I'm a radio amateur. He said, "No." Their means of communication are unknown to us. They do listen in on us, however. I'm assuming they communicate on beams -- light beams or magnetic beams.

CAN WE GET PHOTOS OF TANGIBLE EVIDENCE?:

I don't think they would deny photos. I did not take any because I didn't have a camera with me. I didn't think to ask for anything tangible to bring back -- it didn't dawn on me. This was such a shock & surprise to me, I didn't think of any thing, hardly.

AIR FORCE 3 HOUR GRILLING:

They wanted an account of it, word for word. I told them exactly what had happened, & they were the first to hear it. There were certain details which they asked me not to talk about publicly; but I think in telling it, that everything should be disclosed. I can see no reason for anything being held back. They didn't want me to say that the space people had no money. They did not want me to disclose the type & shape of the craft, because that would indicate the Air Force is not doing it's duty. I told them I could see no reason for that, either (Q. Did the AF impart any new information confirming or tying in with your experience) Yes -- they did at the time, but I do not in any case want to relate any other incident with this. Neither am I trying to prove that the case happened. To me, it makes no difference whether anyone believes it or not. I know the Air Force believed it. I know it from the standpoint that they did a lot of checking down here in the area. They were here for quite some time after the incident, & they proved beyond a shadow of a doubt that the craft was in this area before & after the incident.

# FLYING SAUCERS IN ANTIQUITY

by Francisco Aniceto Lugo, Ph. D.

( EDITOR'S NOTE: The following manuscript was to appear in the forthcoming book UFOS AROUND THE WORLD but because of space limitations could not be included. It is thus presented here, to SEARCHLIGHT readers, for the first time. Dr. Lugo is a Member of the American Association for the Advancement of Science, Washington; Member Titulaire, Societe Asstronomique de France, Paris; Fellow, International Lunar Society, London. He currently lives in Caracas, Venezuela. It is indeed a pleasure for us to present, what we feel, a worthy contribution of the possibility of aliens visiting our world in past cultures. This is the first of such articles to be presented in this series. Others to follow include WHEEL WITHIN A WHEEL by Yolanda Pimentel and FATIMA by the editor of SPACEVIEW, Henk J. Hinfelaar. As always we welcome comments (pro and con) from our readers. )

Many millions of years ago the Earth - according to sound geological investigations and discoveries - was very young and it was truly an oceanic world. She was a ball of water, with only a few inlets on it. Later on, many small islands sprinkled its surface and all of them were covered by vegetation. This geological situation can be ascribed to the Pre-Cambrian era, but you must bear in mind that the chronology of Science in regard to the geological periods is misleading and that the radiocarbon dating has not only limitations, but also its pitfalls. (1)

When the earth was in the situation that I have just briefly pictured, an event of a very great importance occurred: due to an epeirogenic phenomenon, a great continent emerged on it in the region known today as the Pacific Ocean, and, as soon as it appeared, and the vegetation spread itself over it, a great number of beings came from outer space and took possession of it. (2) But those beings were not like us with respect to stature: they were giants. The remainders of the beings are those of which the Bible speaks, by saying that "in those times there were giants, beings of a great understanding and power." (3)

Life on earth has evolved firstly in the sea and later on land, on the small islands of that epoch, and then, when larger ones emerged, the earth man took their first steps. These early men were very primitive indeed: they walked inclined, and their arms were so long that they almost touched the soil, with their eyes fixed on it, and in this manner they could see instantly any snake or any other danger on their way, or to gather easily the things which were good for their taste or that pleased them.

When the giants arrived on the earth, in Mu or Lemuria, they met here the men that our planet had. These ones progressed with relative rapidity, and they did that, not by the force of the acquired characters, as Lamarck believed, or of the natural selection, as Darwin upheld, but by several mutations, as De Vries has established, altho those two factors worked also in a minor degree in their integral evolution. (4)

This last natural tableaux corresponds to a date much more remote than that propounded by contemporary scientists: it pertains to the last period of the Tertiary Era, and in passing I must say that the geological Eras are much longer than science estimates, although it would be useless to calculate its length in accordance with our chronology of centuries and years, as these periods of time were then shorter, and any estimation based on it would be misleading.

Stimulated by several successive mutations, several kinds of men - here on earth - took place, making contact with the giants, who generally were blonde, if we judge by the remainders of these beings encountered in several occasions by seamen, and especially sea captains, who recorded them in their binnacle books. Unfortunately, no mixture could be made between the giants and the earth men because of physical impossibility. But another men of lower stature came to earth after the giants, from outer space, who intermingled with us.

During the dominium of the giants an outstanding phenomenon occurred on our planet. This one developed a piriform protuberance. This pear-shaped eminence was not smooth, but wrinkled, with some natural steps, having rather the appearance of a pyramid. From time to time, something moved within it, reaching increasing intensity and extension each day, and the populace then said that it was inhabited by a god, although the savants knew quite well what was the matter with it. The movements of that thing within the protuberance produced earthquakes around it until a terrific explosion took place in it and our first satellite emerged accompanied by several inflamed masses of matter. It was a fiery spectacle, indeed, for the people who saw them ascending diabolically to the firmament. But only the central body, i.e., the satellite, had the necessary escape velocity to pass the atmosphere and to place itself over the earth in outer space and to orbit around it. The remaining masses, with less velocity, fell to our globe, and there they are, as mute witnesses of this horrid cosmic catastrophe. (5)

The majority of the giants took to their flying saucers and departed. The other ones, unable to fly for the moment, perished in great number, remaining only in small contingents which in a constantly reducing scale subsisted almost until our days while those who departed did not return. Our first series of civilizations - that of the giants from outer space - has practically ended, while our planet was illuminated by our first moon.

It was then that new men came from outer space, with a stature like that of earth men. They developed, intermingled with us (the second series of civilizations) but the days of this flowering progress was damned to extermination, as the satellite approached dangerously to our planet. The savants of the time knew it: they knew that this new series of civilizations would end tragically also, and then they decided to let to posterity a testimony of all that. Thus, they thought of a language that might not be turned into a dead tongue, and thus they decided to write their attestation on the incoming cosmic catastrophe by means of symbols. This they did, by grabbing it in the portico of the Temple of the Sun, in Talassasaya, and in the Great Idol of Tiahuanaco. (6)

After some time in which the year had only 291 days, in reaching the Roche critical line, our first satellite exploded, as foreseen by the ancient savants, and a second cosmic cataclysm took place. The second series of civilizations perished and the earth was without a moon again. A relative short time afterwards the earth captured a new moon and this time a big one. Although it was big, it was not massive, being a density perhaps less tenuous than that of Calixto. Besides, its gravitational binding with the earth was weak. Thus, after considerable time, it broke its ties with our globe and escaped throughout the profoundnesses of space with the same facility with which it was captured. (7)

In the meantime, the third series of civilizations, or Atlantis, developed itself on our planet. It was flourishing and brilliant. During its dominium a huge comet approached the sun and caused tremendous perturbations on the sun itself and a serious cosmic cataclysm both on the earth and Venus. This terrible catastrophe was the third one suffered by our planet, but, although it was very mortiferous on our globe it did not exterminate the third or atlantic series of civilizations. This one continued progressing after the reparation of its damage. The days of Atlantis, however, were counted. (8)

Unexpectedly, two strange stars entered the solar system. The approximation of these two celestial bodies produced on the earth three kinds of tides: aquatic, terrestrial and aerial tides of a great potency. Of these the most important were the powerful terrestrial tides, which caused a volcanic eruption around the globe - the lava came out in horrid explosions practically everywhere and a considerable series of earthquakes occurred. Then the smaller moon, which came forward, exploded, its heavy fragments falling with tremendous violence on the surface of the earth, adding considerable force to the disaster of the earthquakes, our planet trembling and vacillating. The first moon, the smaller which came forward, had reached the critical line and, in this emergency, Atlantis sunk itself. It did not sink itself, however, on account of the explosion of the lesser moon, but much before, when both moons created big terrestrial tides and the Atlantis underground collapsed. After the explosion of the first moon, our present moon was captured by the earth ensuing a tremendous aggravation of the catastrophe. (9)

Then a wide and profound mud sea was formed in a great extension around the site of the submersion, reaching as far as the Pillars of Hercules by one side, and almost equally distant by the opposite points, while at the same time the heaven was covered by thick and black gasses for about 25 years. The Atlantic series of civilizations, the third one, had ended.

( TO BE CONTINUED NEXT ISSUE )

#### REFERENCES TO PART ONE

(1.) The radiocarbon dating (as all the so-called radioactive watches), apart from the fact that it has a considerable limitation in regard to time, being unable to penetrate remote ages, is a method which rests mainly on assumption, and therefore its conclusions are open to criticism.  
(2) The organic evolution has been generally seen by the biologists as the product of a single factor, being these ones the acquired characters (when admitted), the natural selection and the mutations. This is erroneous. All these factors work in the organic evolution, but the decisive one is undoubtedly the mutations, which produced profound and rapid changes in a relatively short time.

(3.) The antiquity of flying saucers is attested by many ancient texts, especially by the sacred books of remote peoples. Also by carvings in caves and passed down through traditions and legends.

(4.) The mutations constitute the most powerful instrument of evolution. It is on account of such mutations that man has mainly progressed physically.

(5.) George Darwin was correct in showing the footprints of the emergence of a moon, but he was mistaken in saying that this satellite was our present moon. Our present moon is a globe too big to be born from our planet. The footprints shown by Darwin corresponds to our first satellite, clearly recorded by the ancients.

\*\* JUST OUT: \*\*

14 FOOTSTEPS FROM OUTER SPACE (\$3.25)

Read about the author's uncanny rescue by a globe of light in the Okla. Desert; about her harrowing experience with a thing from outer space. The amazing sky show by the space people. The giant space ship on Miami Beach. Visions and prophecy. Dangers of the "Flying Saucers."

ORDER FROM: 3 Courtland Street  
New Brunswick, New Jersey 08901

(6.) See on this particular the books "Calender of Tiahuanaco" and "The Great Idol of Tiahuanaco," both by H.S. Bellamy and P. Allan.

(7.) The fact is recorded in traditions and legends and in Indian cosmogonies.

(8.) The disasters caused by this big comet is recorded in sacred texts, including the Bible.

(9.) Many tribes have recorded this tremendous cosmic event. On the other hand, the noted astronomer Otto Struve wrote recently in SCIENCE, organ of the American Association for the Advancement of Science, that only two theories remain as probable today on the presence of the moon in our solar system, one of them being - and the most lucid - its capture by our planet.

#### SID MADRICK CONTACT STORY (Continued from page 1)

(Q. Was there anything else the Air Force didn't want you to tell?) Yes, quite a bit. They didn't want me to divulge their means of communication & where they get their power from. Also, the man's name. They told me I should never repeat this, because it didn't mean anything. The spaceman had said, "You may call me Xeno" - he didn't say it was his name. I had spelled it "Zeno" or "Zeeno". I got notice thru the mail some time later that the correct spelling is Xeno. That's in the dictionary. It means "stranger" or "foreigner."

#### WILL THEY CONTACT YOU AGAIN?:

Yes, it's quite definite, that point. The next one will be my choice & not theirs. I will initiate it by doing something he told me to do & then he will know I'm going to make the contact. They will observe me.

#### THE MEANING OF THE VISIT:

This encounter has meant more to me than just a visit from people from outer space. It means that my life has been lifted 'way, 'way up -- beyond what I could ever have conceived of before.

#### END OF INTERVIEW

(OUR THANKS TO: LITTLE LISTENING POST, 4811 Illinois Ave., Washington, D.C. for this interview)

#### NEWS BRIEFS

A correspondent from Dublin tells us that friends have often seen mysterious lights "and things" along the coast just north of that city. One couple who has a summer house there has regularly seen a stranger walking past, shining a small lamp towards the sea and walking on. He has not responded to casual greetings. The same couple saw a dark object hovering over the water last year. It projected a strong beam of light into the sea. He said the entire area was lit up. Another time they saw a fast moving low-flying object skimming the water coming across Dublin Bay. Readers who think this sort of "goings on" do not happen frequently should read an article entitled UFO PLAGUES N.J. RESERVOIR in the October, 1966 issue of FATE. The article deals with a UFO that cut or burnt a hole in a frozen

over reservoir with a beam of light that appeared to come out of a port hole. These beams of light are quite frequent indeed....Two of the original purposals suggested by former U.N. Aid, Colman Von Keviczky, have apparently been adopted. One of them is that any earthman landing on another planet would be an envoy for all of mankind....Persons desiring to join the Penna. & N.J. Two-State UFO Study Group which holds regular meetings in Easton, Pa. should get in touch with Mrs. Dwight C. Brown, Secretary-Treasurer, R.D.#2, Ravenswood Rd., Allentown, Pa.....The Editor has an article in the August 21st edition of the NATIONAL INFORMER. It is entitled EVERYONE IS SEEING THOSE FLYING SAUCERS and is written under the pen name of W. Brunswick... Sonic Productions, Inc. has just released a new 45 RPM record entitled FLYING SAUCERS UNLIMITED. It runs for about 15-20 minutes and deals with facts & figures re UFOs. Accounts, Names, Dates, Places. Voice on the record is Rev. Frank E. Stranges (whose new 4th edition of FLYING SAUCERAMA we can supply at \$2.50) noted contactee on the west coast. We have copies in stock for \$1.50...

## BOOK NEWS

ENIGMA FANTASTIQUE by Dr. Wm Allen  
Health Research. 200 pages 8 1/2 x 11.  
\$4.25

The author believes that horrible unseen forces control our daily lives. He also conjectors that many world leaders have come to an untimely end because of these STENDEK encounters.

Relating this to flying saucers, powerful political & financial parties Dr. Allen has written, in our opinion a most worthwhile volume.

Also the much talked about Nikola Tesla, electrical genius, is discussed in depth. Some years ago another author, Margaret Storn, suggested that Tesla - because of his advanced genius - was in reality a spaceman brought to earth as a young boy. The author of ENIGMA FANTASTIQUE hints the same thing but makes no direct reference to this possibility besides saying that Tesla was 1,000 years ahead of his time.

The author also discusses Atlantis, the Perris Recies map (photo included), UFO, Secret Societies and hidden Gov'ts.

But the best section of the book for every Shaver fan is a chapter on the Multa Caverns inhabited by horrible giants, blood curdling screams, and other Shaverian features.

Here is definately a book for every Shaver fan although the author apparently never heard of our good friend. Such a pity as Dick has been say these same things for years.

AVAILABLE FROM: Timothy Green Beckley, 3 Courtland St., New Brunswick, N.J.

THESE RARE USED BOOKS NOW IN STOCK:  
F.S. FROM OUTER SPACE, Keyhoe (\$5.00)-  
BEHIND THE FLYING SAUCERS, Scully (\$2 paperback edition) - F.S. CONFIDENTIAL by George H. Williamson (\$3.00). Send 5¢ for back issues of saucer magazine, and list of names!
