We da'ren't trust ourselves with "words"! (Overheard at Bergerhout)

BELGIAN LAW

IS ONE EASY LESSON
LAW YEA EN

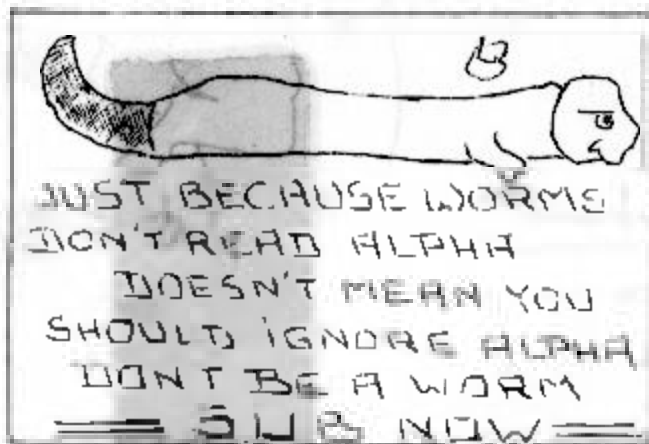

Known, but unsuspected as to its possible applications, a short sentence in one of the innumerable lawbooks of Belgium has suddenly become a very important factor in fannish activities:-

The holiday period will be considered as running from 1st May to 31st September.

Made into law to ensure that us poor labourers would enjoy our leave during the "season" it has occasionally been applied for other reasons.

A certain Belgian firm has recently mentioned the fact of this law's existence to one of its employees. No prizes offered for guesses based on this article.

CRIVING ED

Our serial.....

will be continued as soon as we have confirmation that intentions to curvies and figures are within the scope of OMPA.

ABBREVIATED LIST OF BFD WORDS

Please note that the following words should ~~never~~ NEVER be used in fanzines

I know this is
all very silly, but I
have to put something
here just

to give

you

the impression that

I actually have

put certain words
down here

I wonder how it will
work out.

We are quite sure that this list is far from complete, and would gratefully accept contributions for further instalments. Jan
