THE MELBOURNE SCIENCE FICTION CLUB NEWS

19 SOMERSET PLACE, MELBOURNE, 3000

Dear Members,

Box 1267L G.P.O Melbourne

We have been given an ultimatum by McGills that we either continue to pay the full rent for the old clubroom or we move out. All the books and furniture and projectors are still there, and the committee has been using it as a base of operations so to speak. Under the circumstances this will have to cease and all our goods will have to be moved out.

This is going to make things very awkward as we have not yet found anywhere to move to. It does not seem possible to find premises in which we can combine all our activities. Paul Stevens is trying to find a flat big enough to hold meetings but he needs someone to share it with him, this does not solve our problems of storage space for all our junk. There is only one answer. I will take all that I can down to my place and store it in my garage. I cannot take everything however and if anybody has any space to spare for the display boards, tables or chairs please let me know now.

We will be moving next Saturday, and Sunday if necessary. Just turn up at 19 Somerset Place next Saturday afternoon if you can help. Another big problem is finance. If you can make any small donations to club funds it will be greatly appreciated. As I said in my last letter The Gazette and the loss on Film Group shows have put us \$200 in the red, just when we sorely need cash carry on.

Yours

Merv Binns
