

THE GALLANT GALLSTONE

A somewhat truncated issue published by Jack Harness, Apt. 3, 519 S. Hobart, Los Angeles 5, Calif, for APA L & F. DUMP5-1259

A FOUR POUND BAG DEPT

BREN SPELLS: Interesting to see that the Ghodlike Collators go to even more trouble to fowl things up than we do, when they're not In Control of the Disty. Now all we have to do is remember to have something handy for every official LASFS function-- maybe I should do a GALLSTONE SPECIAL to give you to keep on hand for the next occasion.

FRED PATTEN: Various people who would have attended the Picnic if they had received a set of directions (and remember that you should have checked dance people like the Ellerns don't ordinarily get APA L Disties) won't pay, because they didn't get a map of the area. I can't blame them for not wanting to pay.

KATYA HULAN: Since you ask, I'll mention that Scientology has no pronouncement on the similarities and dissimilarities on twins, identical or fraternal. But I can mention the obvious: that identical twins would have identical, or near-identical, experiences in the womb, and thus would have a nearly-identical set of pre-natal engrams... Secondly, even if they are twins, there would still be two individual souls to be considered, and that they would be likely to have extremely different backgrounds. Because it is not a revealed religion but scientific analysis, Scientology would have to test every case separately.

RENDER UNTO KLAZMON THAT WHICH IS KLAZMON'S, AND UNTO LLENDERLLOON THAT WHICH IS LLENDERLLOON'S

Appologies for an uninteresting GALLSTONE thistime; time has been scrunched up lately and I have had no time to savor the last Dispensation.

VAN ARNAM: Are you prejudiced against religion? Define your term "religion"-----you undoubtedly mean organized orthodox churchiness, which is bad, and which historically had deteriorated even from the best beginnings, and which has led nations in war under the guise of "peace"---but if you happen to include the Continuing Search, the Great Questions Concerning the Cosmic All in the religions you are completely against, I would have to debate the point with you. Prejudice seems to me to be unwillingness to be reasonable and investigative about the case of a new individual person or thing which you condemn as a class because of past experience. (condemning something on the basis of a Creed or Dogma which you have not personally investigated is prejudice.) Prejudice as a word means judging in advance of investigation.

.....X.....
S'PERDIPLOMACY!
.....

This issue has been published on paper distributed by ART-CRAFT Printers and Stationers, of 128 E. Holt Blvd in Ontario, California., for APA L. This is a sample of MAFI mimeo-- I don't know what kind of paper APA F will receive this on, but it will probably be cheap stuff. APA L paper contributed by Fred Whitledge.

Those faithful few in the audience who have been keeping track of the PUZZLE in GALLANT GALLSTONE for months now can relax and complete the puzzle. Above is the final piece..... Please remember, however, that PP # 3 will have to be recut slightly to make it fit. The complete puzzle will, if cut in half diagonally, give a profile of Phil Castora's nose--- and if you take the resultant complete puzzle and duplicate it and join the two puzzles, side by side, you will have a geometric representation of Harry D. Gold's head. # 33
