

THE SEARCHLIGHT

A SEARCH FOR THE TRUTH THROUGH RESEARCH AND A BETTER UNDERSTANDING OF OUR EARTH

VOL. 1 NO. 1

APRIL 1964

12 ISSUES \$2.00

This is the first of what we hope will be many issues of "The Searchlight". Seeing that it is our first issue we might take a moment to tell you what we hope to accomplish. First of all our main objective is to cover the Shaver Mystery and the Hollow Earth theory.

However from time to time we shall also print news regarding other offbeat subjects such as saucers, Fortean phenomena, and other material which the larger publications in this field consider too hot to handle.

We hope to devote the main part of each issue to our readers and to publish their comments as well as their personal experiences in the field. Through private research and a better understanding of our earth (past, present and future) we hope to progress greatly in this field.

Besides the letters from time to time we shall print a feature article or two and some short comments regarding this particular field.

In association with the INTERPLANETARY NEWS SERVICE this editor hopes shortly to publish a series of books on the subject of a subsurface world. We ask those who have had the opportunity of having any personal experiences of this nature to send them in for our ever expanding files on this very important topic.

As far as we know "The Searchlight" is the only magazine of its type in existence devoted entirely to the Shaver Mystery and the Hollow Earth. We would appreciate it very much if you were to tell your friends about our publication and support it yourself any way you possibly can.

Your comments on this issue would be greatly appreciated.

LETTERS FROM OUR READERS

First thing we must realize is that about our past, how was the earth formed, what is it constructed of. Our planet is composed of material, from a semi, or non-material stock, which was originally a mass of vibration, sounds, or combinations of solar radiation, or, most likely the combined efforts of these conditions, met, combined and formed a giant vortex like a giant hurricane gathers all particles in its path.

This huge force in space gathered together like particles, most of which were over 95% water, in its travels or motion, gathered other particles which subjects to high rates of vibration gave spores or seeds that were capable of producing life. Through crystallization huge land masses were made some of the land masses broke off from the mother source and became satellites, such as our own moon which is actually a part of the earth. There was water above and below the land masses, until finally after about 15,000 years a hollow section was formed by the rotation of the earth. It is the motion and rotation of the earth that holds it together, or hold all particles to it, which we call gravity.

Since the Sun or Suns that exist in space are COLD BODIES, existing at level of absolute zero, this makes these suns almost pure energy. As our planet traveled through space in a straight line (before it was captured in the attraction of our sun), it experienced different levels of temperatures, at times steaming hot, and other times rigid cold, this accounts for the various geological stratas we find, especially in the Southwest.

Volcanic eruptions, earthquakes and huge tidal floods is what formed the earth as we see it today. The Grand Canyon is an example of Volcanic, earthquake and then huge tidal floods which formed it. Life, intelligent and otherwise existed, through many periods of earth changes through its straight flight course in space. The ancients were able to chart the earth's path, and by so doing were able to tell what effects it would have upon the structure of the planet.

They therefore, built their cities underground in order to survive, or to have a place to come back to while they fled into space during each of these catastrophes, in which our earth has experienced at least five, and possibly seven. The last great known one occurred about 24,000 years ago, and Atlantis and Lemuria sunk into the abysses of the deep, to

sleep until another cycle comes when it will again rise. These cycles occur every 24 to 26 thousand years, in which we are due for another soon.

At the last such occurrence, the ancients left the earth and did not come back, but promised to come back at the next cycle change. This means that their ancient cities are still there, in the earth, some remains on the earth's surface are still intact, and some artifacts can be visibly detected, except by the scientific minds who believe that they only, are the greatest minds that the earth has ever known, and so refuse to see these remains for what they are, that they are a message to future man meaning us.

These ancient remains have been discovered, and are controlled by beings that are not at all like us, in the sense of mental capacities. They think different and so live different. Their moral codes are nothing which we can fathom.

They control our earth, and the space lanes above our earth, because of their enormous fixed defense systems which can reach miles out into space. At first they were beneficial people, they later became the opposite, and warring faction split up, some good some bad. As they deteriorated, they became more and more depended upon their slaves. Many of the underworld people were forced to go on the surface (maybe this is the Adam and Eve story of being forced to go out of the garden), their enemies believing that they would either perish, or else be forced to produce products which they could take away at will.

They found the new surface races to be very virile, strong, attractive as time went on, and very inventive and productive. They destroyed civilization after civilization, in their frenzy to enslave people and masses. They have always had space crafts, many of the large ones are still intact, but the knowledge to use them is far lost, and the smaller crafts are only capable of travelling not farther than our moon, or our planetary system.

In the past 50 years they have imported top notch men from Germany in the engineering field, to improve their equipment. Many top Russian's have been there for more than a century. In the past war, many great men of science and engineering, who were little known except with their own small circle, from the European and Asia area, were kidnapped and deported to these places

under the earth, and are building, repairing these war machines.

These are the solid objects we see. Since matter can be changed into light, and light into matter, this phase of science has been well covered by these beings, but has not been completely conquered. But as I said, the saucers come from BOTH sources, outer space and inner space as well as earth sources. Charles A. Marcoux, Phoenix, Arizona.

ooo00ooo

I have been carrying on my own private investigation of the Subterranean world for at least 31 years. The first time I ever heard of this subject was from Doreal. This was long before he moved to Colorado. He came to my home town (Harrah Oklahoma) and started a class in Occult studies. He told of his own experiences while living on his father's farm (near Sulphur Oklahoma) and how he had entered a cave on that farm and met and studied with a race of blue people who had no eyes. (For they lived in total darkness.) He learned very much from these people and later went to India for more extensive study. I did not keep up with what Doreal taught for I was just a child at the time and my mother and father lost interest. But Doreal took a very deep interest in me at the time. He told my mother that if I had the right training I could become a very great mystic.

In later years I became interested in the "Shaver Mystery" and thusly wrote Shaver from time to time. I brought much information from him. Through my experience I have learned a few things which I will pass on to you:

1. If you suspect anyone of being from the underworld don't ask questions! Pretend that you already know. If you ask questions you will find that they won't talk, but if you pretend to know then is when you will get the information.
2. Also don't make any trips alone without letting at least three people know you are going. This will prevent you from being lured into a trap.
3. Don't ever follow the directions of a soft sweet voice. This can only lead to your death or worse.
4. And by no means go into ANY cave alone.

I hope you succeed in this endeavor. I will be glad to tell you about my personal experiences from time to time. Mrs. Cosette Willoughby, Ben Lomono, California.
