MOON ONCE VERY CLOSE TO EARTH

WASHINGTON, Jan. 14, 1965 - (NANA)

Once the moon may have been within 9,000 miles of the earth—20 times closer than at present.

This would have been many millions of years ago, long before the first appearance of life and shortly after the origin of the earth and moon. Then the pull of the moon's gravity, now noted in sea tides, must have been much greater.

This thesis is proposed by Dr. Lawrence K. Lustig, of the U.S. Geological Survey, to explain puzzling features of the present structure of the earth's surface.

"It is generally agreed," he said, "that a remarkable number of short-term oscillations of the earth's surface must have occurred at some time, leading to shallow seas that washed over vast areas.

"One of them covered the entire United States east of the Rockies.

"The separation of the earth from the moon may have increased through time. The tidal forces on the earth must have increased through time. The tidal forces on the earth must have been proportionately greater in intensity and frequency and might have caused the buckling of the earth which resulted in the shallow seas covering the greater part of our continent."

WATER FOUND IN ATMOSPHERE OF VENUS

A team of John Hopkins University astrophysicists said on Dec. 7 that the clouds surrounding the planet Venus are composed of water in the form of ice particles. The scientists said the finding of water vapor on Venus raises the possibility of oxygen in its atmosphere. They based their reasoning on calculations that all of Earth's oxygen could be accounted for by the releasing of oxygen from water vapor in the upper atmosphere. The possibility of a source of oxygen and carbon in its atmosphere raises the possibility of life on the planet.

ONE WORLD VS. MARS IN 1999

Bert Bacharach columnist for the New York Journal American said on Friday November 27, 1964...

"Nostradamus students claim he predicted the nations of the earth will unite in 1999 to repel an invasion from Mars..The ruling planet of Sagittarius is Jupiter; the lucky day is Thursday and the lucky number is 3."

EARLY SAUCER SIGHTING

SIOUX FALLS, S.D., July 7, 1947 (AP)

Some Iowans have reported seeing the mysterious "flying saucers" which have been mystifying the nation for twelve days, and one said he believed he had seen one of the saucers as long ago as July, 1946.

Orrie Miller, engineer at radio station KSO, reported that last year, while he was driving from Muscatine to Wingfield at about dusk, he saw a "bright object" which he thought at first was a locomotive headlight, until it occurred to him that there was no noise.

"It was low in the sky and was flying at high speed in level flight," he said. "It appeared pear-shaped and gave a brilliant light."

Miller, an amateur astronomer, said the object hardly could have been a meteor, because "it had no tail and its level flight was not like that of a meteor."

He said he believed then it might have been one of the high speed projectiles the Army was experimenting with and so he did not report his discovery because he feared he might bring about the revelation of a military secret.

SAUCERS OVER D.C.

Paul Dickey Jr. and Ed Shad, Army communications systems specialists, observed along with 10 others, some 12 to 15 white oval-shaped objects moving in erratic courses 15,000 ft. above Capital Hill. The UFO's were being chased by 2 jet planes with delta wings. The Defense Dept. disclaims knowledge of the incident. (January 11, 1965)

SUBTERRANEAN CITIES OF THE ATLANTEANS

BY WORLD
RENOWN AUTHOR
DR RAYMOND
BERNARD

This article is a report on my eight years of research dealing with the Subterranean Cities of the Atlanteans in Brazil. I arrived in Brazil eight years ago and then met a Theosophical leader who told me about these subterranean cities, inhabited by a super race of Atlantean origin, that exist in this country. He referred me to Prof. Henrique Joes de Souza, president of the Brazilian Theosophical Society, at Sao Lourenco. Prof. de Souza erected a temple dedicated to "Agharta", Buddhist name for the Subterranean World. Here live Theosophists from all parts of the world, who all believe in the existence of these subterranean cities.

Professor de Souza told me that the great English explorer Colonel Fawcett is still alive, living in a subterranean city in the Roncador Mountains of Mattor Grosso, where he found the subterranean city of Atlanteans for which he searched, but is held prisoner lest he reveal the secret of its whereabouts to the outside world. He was not killed by Indians as is commonly believed. Prof. de Souza claimed he has visited the subterranean empire of Agharta. I then went to Matto Grosso to find the subterranean city where Fawcett is claimed to be living with his son Jack, but failed to do so. I returned to Joinville in state of Santa Catarina, and there continued my research.

Two of my explorers here in Joinville just returned from entering a tunnel near Ponte Grosse in the state of Parana. One of them had recently entered alone and spent 5 days in the subterranean city there. It had about 50 inhabitants plus children. The fruit orchards were recently planted, and the inhabitants received fruit from another subterranean city. During the last visit, the two explorers were met at the entrance of the tunnel by a guardian and the chief of the city, who told them that they should return in two years when the fruit trees will start to bear, but cannot enter now.

These same explorers entered a tunnel near Rincon in the state of Parana and came to a chimney-like structure with four chains hanging down. They descended on the chains but when they came near the bottom a gas with a chemical odor started to come up and forced them to ascend. Obviously the subterranean dwellers tried to keep them from reaching their city.

Another explorer who is a mountain guide at the Mystery Mountain near Joinville said that, several times, he saw a huge luminous flying saucer ascend from the tunnel opening that leads to a subterranean city inside this mountain, in which he heard beautiful choral singing of men and women, and also heard the "canto galo" (rooster crowing), a universal symbol indicating the existence of subterranean cities in Brazil. He said that the saucer was so luminous that it lit up the night sky and converted it into daylight. On one occasion he met a group of subterranean men outside the tunnel. They were short, stocky, with reddish beards and long hair and very muscular. When he tried to approach them, they vanished. Often he saw strange illuminations in this same area at night, probably produced by nearby flying saucers. I have used the name "Mystery Mountain" rather than reveal the true name of the mountain, in order not to reveal its whereabouts.

An elderly colored man living in Joinville visited a tunnel near Concepiao in the state of San Paulo and saw in the distance a marvelous subterranean city with vehicles darting back and forth, evidently travelling through tunnels from one subterranean city to another.

The following report although requiring confirmation was told to me by an explorer friend of mine. He said that he had visited a tunnel near Rio Casador, in the state of Santa Catarina, and there met a beautiful young woman appearing to be 20 years of age. She spoke to him in Portuguese and said that she was 2,500 years of age. He also met a bearded subterranean man. Still another explorer visited this same tunnel and saw a child inside, who fled on seeing him. He once lay in front of the tunnel opening and observed a man with a beard and long hair pass over him entering into the tunnel.

Another of my explorers visited a tunnel near Gaspar, Santa Catarina, where he saw wonderful fruit orchards inside loaded with fruit. He also saw a subterranean woman with a child in her arms reading to it aloud from

a huge book written in an unknown language (Atlantean). After she read each sentence the child repeated the same and in this way was taught how to read. All of these subterranean cities are illuminated by a strange light.

We are now making an all-out effort to reach a subterranean city and arrange to bring there our friends from the United States who wish to establish residence there and so escape fallout from the coming nuclear war. There are about 35 men, women and children here who wish to live in a subterranean city, where there are no economic problems, since money is not in use and the fruit orchards provide food for all. All interested in my plans should write to: ORDER OF ISIS, P.O.Box 554, Joinville, Santa Catarina, Brazil. We are anxious to collect a group of spiritual people willing to live on fruits and practice strict continence and bring them to a subterranean city.

NO FLINTSTONE CIVILIZATION BY RICHARD S. SHAVER

With the stones I have discovered I could well entertain a TV audience by showing them the pictures I have been able to find on them. I haven't been able to do so to date but I recently did get a TV cameraman to come around from a town in Wisconsin called Wausau. The police from Milwaukee butted in on the interview and like weirdly propelled automatons said the worst possible things and asked the most ridiculously unanswerable questions all phrased like "When did you beat your wife last" or "When did you stop beating your wife" etc.

But the stones and pictures were effectively covered up by a regular walk on by the police in my own front yard timed precisely to break up the interview and to have the TV news get the worst possible tape for later broadcast. I am now looking for an active agent to do a series of such talks for TV, radio and lectures. I know they would go over big because it is such a fascinating subject. Anyone who is interested in this opportunity can reach me through your publication.

No casual examination of my stones is very rewarding as its like learning a new way to see. Especially for someone who never used lenses or light angles. Stones will show pictures in a dim light at a sharp angle such as you get from a window just at sun set for instance but when seen at noon no picture is visible.

Stones which look innocent at noon in sunlight, will show marvelous pictures by flashlight at midnight because they are designed for artificial light at a sharp angle and the pictures are multitudinous, that is made to be scanned on a rotating stone so the light angle reveals a new picture continuously as the stone turns. Right way to view them would be a pencil of polarized light fixed on them and have the stone rotated by a dockwork mechanism while you have various lenses in readiness large four inch lenses held at arms length. You can soon learn to digest the flow of images in the same way you can understand pantomime by regular study of these stones.

To simply glance at the stones and say "Shaver is seeing things" is the wrong way. This is the way of the idiot who just can't flex his mind enough to accept anything new that contradicts his teachings and does not correspond with his idea that nothing but the Flintstones existed in the ancient past. Were he only aware that the earth has been highly civilized at many times in its journey through space!

The Flintstone idea is completely out of line with what I have discovered. This phoney idea has been fostered for centuries by those who live under us in the caverns. It is hard for the ordinary mortal to understand this as he has a block against even considering such a new idea, let alone accepting it as a FACT. But if you can throw off these pre-conceptions long enough to actually observe the stones intelligently you can learn more about the past in a shorter time than by any other method. But you do have to have a quantity of these stones as one corroborates the other until all at once you realize the things which I have said for years and am now SAYING ONCE AGAIN in THE SEARCHLIGHT are true and then your mind and eyes can really get to work.

Please feel free to contact me through Mr. Beckley and his publication.

			These two active researchers did much research in this area and came up with startling results. Introduction by Riley Crabb.
			by: J. Clark & R. Birner. Is our planet being invaded by beings from space?

Science Is Wrong About Space

By Victor Pence

Science is wrong about the Universe; speed of light; and Einstein was wrong about many of the things he thought about in relation to our Universe. The speed of light is supposed to be the absolute speed in the Universe. I say that it is NOT the fastest speed. I say that the STARS, GALAXIES, ETC ARE NOT THE DISTANCE THAT THEY SEEM TO BE FROM US. I further contend that the STARS ARE MUCH CLOSER TO OUR UNIVERSE THEN WE NOW BELIEVE!

Science is the victim of its own knowledge and tends to be narrow minded about ideas that cannot fit into their own facts. All my research has led through the mysteries of Shaver, UFO's, Spiritualism and the Bible. I have found that without one you could not have the other; but the most important fact of my research is that no matter which way I go about my findings I am always brought back to the Bible.

Light from the stars does not take any length of time in reaching us, it seems this way because when light enters our solar system it enters the gravational field caused by the Mobius Strip and thus is slowed down to about the speed that science tells us is the speed of light. Before light reaches this field I have reason to believe it is much faster than we know it to be. If a person were standing on a planet OUTSIDE our own solar system he would see the light in a second or two after it left a star anywhere in the universe.

It may be very possible that man will reach the moon and Mars but I say that we will never leave our solar system! If we get to the outer reaches of our system we will find it difficult and we will probably curve back on ourselves and end up back on earth. Just as gravity keeps us on the earth a giant "Mobius Strip" will keep us in our own solar system.

But why are we bound to our own system? When God created men he gave him the choice of ruling this earth or disobeying God. Satan had been given the first chance but decided to be higher than God so was cast to the Earth of which he has been the ruler for the past 6,000 years. Since Adam refused rulership of the Earth he had to live under the rule of Satan and since Satan was cast to the Earth for also disobeying God they were not permitted to mix with the angels that roamed the universe. A prisoner is placed behind bars and Adam and Satan were also placed behind bars. These bars were AIR, GRAVITY, FOOD, WATER, ETC! What better way to punish sinners than to put them where they cannot possibly mix with the angels. The Earth is the last place in the Universe in which sin exists and after the second coming sin will be no more. Since the fallen angels were also very smart in the ways of science God had to have a way to keep the demons here so he created gravity to keep the angels on the earth. To me the Tero/Dero are these fallen angels.

Attack From The North Pole?—Robert L. Dobbins

In "The Door to the Future" (Jess Stern) Mrs Dixon and several talented people predict that the U.S.A. will be attacked from the north pole and slant eyed people will be victorious as they make their surprise launch between Greenland and the Davis Straits. She took this to mean Red China but there have been many stories in which the undergroup people are said to have slanted eyes also.

While in New Mexico I conversed with an elderly Spanish lady who had observed a beautiful woman coming from an underground cavern which had an entrance near a river. She was courting a Spanish man who also disappeared into the cavern and never came back out. Also very recently I talked with a sailor in this area who claimed to have got a view of the underground city near Tiber that is said to have a population of several thousand. Instead of my believing in the idea of these crafts coming out of the hollow earth to save us from the A Bomb they may be just sizing up us for the attack. This would even be more of a threat than an atomic bomb.

It is logical that the earth is hollow. If you drop melted metal into water it forms small spheres. If you cut the metal into two sections it is hollow. Gravity is much different than what is printed in text books. The same with antigravity devices. Gravity is due to the earth's rotation combined with travelling around the sun. If a person made an antigravity device it would have to be more like a gyroscope than a type of magnet.

Most people I feel are like the Navy man I talked with who spent 6 months in an atomic sub under the ice. He knew nothing of subterranean saucers or people.
