A COLD MAGNETIC BODY BY: CHARLES MARCOUX

Through my research I have come to the conclusion that the sun is A COLD MAGNETIC BODY and not a NOT GASEOUS ONE as Science has long thought. It is like dry ice, so cold that it feels hot, or appears to be hot. In the summer time, when we have our warmest weather, the Sun is at it farthest point away from the Earth, this definitely indicates to me that it is a cold body, since in winter when it is closer to the earth we have extreme cold weather.

If you got cold, you would seek a warm place, the closer you get to a hot stove, the warmer you get, walk away from it and you soon get cold again. If the Sun is a hot body, giving us heat and life, then why is the conditions the reverse to known natural laws? In the summer months the LIGHT is brighter than in the dull gray of winter.

In the fall of the year as the Sun gets closer, life withers and dies science explains this away. In the spring as the sun gets further from the earth life buds forth and regenerates. So, I say that the Sun is the giver of DEATH, and not life. Being a cold body, it effects us as a cold body. We put food in cold storage to keep it, preserve it until we need it. That is what the sun does, it hibernates life.

It is these various weather changes which brings on strange diseases, pollination of plants etc that causes various disturbing diseases, plus the cold magnetic forces of the Sun and other solar radiations which effects us and bring finally old age and death. It is this very reason that the Elder races went underground, away from Suns and solar and Cosmic radiations.

After God had said "let there be light in the firmament of the heaven to divide the day from the nite, and let them be for signs, and for seasons, and for days and years" he created "fowl that may fly above the earth in the open firmament of heaven."

If we can accept the Bible, we find that heaven must be the ATMOSPHERE that exists above the earth for a couple of hundred miles, that the ATMOSPHERE is the FIRAMENT, for the fowl could fly in it. We know that birds have an uncanny way of flying, of knowing just where to go, but PLANES DO NOT KNCWN, and many of the strange accidents are caused by vibrations which fowls are aware of, and are able to fly without being diverted into strange accidents. There are cases where birds have had strange freakish experiences such as not being able to control their flight and huge flocks of birds acting as if mysteriously lost. The birds that go South, the uncanny BAT and other strange migration habits all prove that they are equipped with organs that detect vibration of other living things in the atmosphere, or firament, such as SPIRITS OR DEMONS, so called flying saucers, and all follow flight patterns which avoids these conditions, except in rare instances.

Gen. 1:19. "And the evening and the morning were the fourth day." Remember that in verse 16, God made two great LIGHTS, the greater light to rule the day, and the lesser light to rule the night.

But in verse 19, it says that evening to morning is the DAY LIGHT, THE GREATER LIGHT, what we call NIGHT LIGHT, so, it is apparent that what we call darkness is the greater light, and that our so called Sun light is not so good. That's what it says, and this is repeated six times, so make no mistake about this point. It is not the Sun which gives us heat - light and life, but Mother Earth herself.

You have read the Bible story of the flood. It says that the WINDOWS OF THE EARTH AND THE WINDOWS OF THE HEAVEN OPENED UP, and the waters did come etc. Further in the Bible, we find that the STARS ARE THE WINDOWS OF HEAVEN. How can it be if the stars are so far from the earth that water came from them and flooded the earth? The Astronauts could not see the stars in some cases. I say that the stars are not what we think they are, that they exist just a few hundred miles above the earth, and the light which we see coming from them is the LIGHT FROM HEAVEN, it is the windows that lets the light shine through.

Take a pair of binoculars and look real close at the stars and notice the LIGHT, and see how different it is from any other kind of light that we live with. The light is a duplicate of the light seen from some saucers.

Sometime ago I observed one of these silvery saucer climbing straight up, and it appeared just like the stars around it. After awhile it disappeared, but the strange part of its disappearing was that it seemed to PASS THROUGH A LAYER OF SOMETHING, AND ITS LIGHT SEEMED TO GLOW REDDISH AS IT PASSED THROUGH THE LAYER and beyond it out of sight.

According to the Bible the Earth was at its creation completely surrounded in a bubble of water, there was no rain, or moisture that wet the earth. Something came along and broke this bubble and the rains did fall on the earth. At one time, according to the Bible, the earth was 7/8 land, and 1/8 water, or something very close to these figures.

Our earth spins around the sun, every part of it is exposed to the Sun light sometime during each twenty four hrs., except at the poles. When it was created the earth SPUN LIKE A TOP, that is one side of the earth was continuous NITE LIGHT and the other side was CONTINUOUS DAY LIGHT. This system was how the earth was able to purify itself of any contamination, with the water bubble protecting it from solar radiation.

In the Orient, the lotus blossom is the symbol used for mother earth, & MU, Lemuria used this symbol also.

Draw a sphere, divide it in four parts leaving about 1/8 of it showing.

In the Bible it says a fountain went out from the garden, and four rivers divided the land from the water, and that it was 7/8 land, and 1/8 water. You draw a lotus blossom and you have a picture of the earth as it was. Draw a circle around it and this gives you an idea of the water bubble.

We know from atom tests that water is the only means to get rid of radiation or fallout. The water bubble was our protector - it not only kept out waste solar material and radiation but it also deflected and reflected such conditions away from it. So when the earth bubble broke and the rains came, all the radiation came with it, plus the disease and the death.

EDITOR'S NOTE: In this regular feature Richard S. Shaver will answer your many questions personally. Address all questions to SHAVER SAYS in care of THE SEARCHLIGHT, 3 Courtland Street, New Brunswick, N.J. 08901

QUESTION: Why is the U.S. Air Force withholding information on Flying Saucers? So many people see them it is useless to say they do not exist.

ANSWER FROM RICHARD S. SHAVER:

There are several reasons, all interlocking. The main one is due to individual mental control from the cavern ray...many a good airman unconsciously receive thoughts on which they act to suppress and with-hold information.

The second reason is also mental control. Airmen who sight saucers are ridiculed and laughed at by their superiors and other airmen and associates, not because the people who do this really want to do it but because they receive unconscious suggestions to do so and do not know enough to resist the impulse. This is also true of reporters and others who should know better. They have consistantly made a joke of everyone who sees saucers until it is much as the man's job is worth to say a word about it. That is anyone in the organization learns by bitter experience that he cannot get his information respected or received by anyone who should receive it and act on it accordingly.

So he just keeps his head low and keeps quiet or joins the bandwagon and ridicules the next "boob" who trys to tell someone he has seen a flying saucer.

QUESTION: Is it true the F.B.I. said you were 25% correct. Just what exactly is the story behind this incident?

ANSWER FROM RICHARD SHAVER:

They didn't say this to me. They may have said this to someone else. There was a time when the FBI sent out operatives to interview everyone who said they knew anything about saucers. They had plenty of reason to do this. One of them called on me.

I asked him to brief me on what he had heard, whether it was really safe to talk confidentially about what I knew or whether the FBI might later use what I had to say against me, say in a sanity hearing or something of the kind. He gave me no satisfactory assurance of confidential reception, that is I couldn't tell just why the FBI was interested in me in particular, so I said "Well, if you can't talk because it isn't safe for you, how can you expect me to talk to you...you've got the power, not me?"

These are not the exact words exchanged but its what went on in my head as I recall it -- that was nearly twenty years ago, give or take a few.

Actually, I said that I was more interested in the telepathic angles of the saucer flap going on at the time and that I thought they were somehow related...that what I knew personally about the saucers was derived from sources which he could not be expected to respect nor which I wanted to disclose to him.

He was not at all a good interviewer, but rather a very large wrestling type individual who sat glumly examining me like a hoptoad in a frying pan and said very little. I don't think that they could have picked a type who would be less apt to learn anything about under-the-counter saucer activities.

Even the FBI should know, from the way they act, that it isn't safe to say wild things to them. If this fellow wanted to really learn something he would not have come as an FBI Agent but as a fan with leading questions.

I have tried for years to get a GOOD interview with the FBI on a square deal level, to make sure they had received information I know they needed, but it is in fact impossible to get such interviews unless you do NOT indeed want them.

We do NOT have an intelligent "Intelligence service" in this country, and if you don't believe me just try and contact them. You cannot tell them anything and if you continue to bother them they call the local police to protect them from nuts, I have heard from several who tried.

How they manage to learn anything about anything is beyond me! They are carefully sheltered from all chance contacts with the minds of people who need them by a wall of secretaries carefully conditioned to refuse all bothersome information.

I sincerely believe that any group of people with moderate intelligence could be assembled and told to gather information on any subject and would do so with about ten thousand times the efficiency of the FBI. This is not because they don't want to gather information, but because they are mentally blocked, their minds sabotaged by what I call tamper...and they thus cannot in fact inquire intelligently into any of these subjects which you and I know are so all important. I suspect they suffer from an all consuming fear, (not a natural fear but a kind of mind block) at the mere suggestion of being curious about telepathic agents, flying saucers and the like.

That is, if you sneaked up behind an FBI man and said "Flying Saucers" he would jump about ten feet in the air. And he would not be able to question you at all, but would just walk off, in fact.

Their minds have been artificially closed along certain paths. So have most of our so-called scientists and intellectuals. They are being maltreated mentally by mind sabotage from the caverns.

They too hear voices, and obey some of them, just when they should not! I have heard them THINK these voices are a separate "Intelligence Agency." (It is, the only one on earth that has good information about anything.) But they are locked in a death struggle with the deros and can't get free themselves long enough to set the FBI and similar groups right.

^ANEW THEORY LIGHT IN SPACE BY VICTOR PENCE

The speed of light is generally put at 186,240 miles a second. Yet according to several news reports the Navy is said to have bounced a radar beam off the moon and recorded its speed at OVER 240,000 miles a second! People who are not scientists wonder how the speed of light can vary so when all scientists say that light is the absolute speed in the universe. But how can this be when two different tests come up with two vastly different speeds? I suggest that if a 100 different tests were performed that each would show a different speed.

Just as gravity has been found to be unreliable in different parts of the world so is light speed unreliable in different parts of the globe and in our own universe!

I have long been a student of Herbert W. Armstrong and because of his writings I have come to a better understanding of the Bible and of the Universe itself. I do not wish to imply that because of studying Armstrong's material that he is the source of my ideas but I do wish to imply that because of his explanations of the Bible many new thoughts have come to me making possible a clearer understanding of God and his very purpose for our existence.

On a recent "World Tomorrow" radio program Herbert Armstrong stated that several astronomers had discovered an area in space that was COMPLETELY empty of even one star! Armstrong extended the idea that perhaps the people living in this area of space had sinned to such an extent that they were destroyed. If this is so then perhaps the people that were sinning were the angels that had followed the Devil in his battle against God. When the battle was over God banished the Devil and his followers to this earth, then destroyed that part of the universe that was infested with sin.

After the Devil and his angels were banished to earth they were also in the demenison inherited by man. They entered the area in space that consisted of a space time demenison thus causing them to age as men but on a

smaller scale because of being spirit.

It is said that a day in the sight of God is a thousand years in our time.

The universe in which our earth, and solar system exists, is very much apart from the rest of the universe. Our world is one of sin and because of this we are left out of the rest of the universe until that time when we learn to be good children -- just as all our neighbors in the solar system.

Suppose that light from some place in the universe reached us a split second after it left its source. Impossible! Maybe not. In our universe we have to contend with many factors including gravity. In a perfect universe there probably wouldn't be this force to contend with. If we all become perfect and live with not against God we wouldn't need gravity because spirits can levitate themselves.

Gravity is the one condition that we sinners must put up with because it keeps us on this planet. In order to overcome gravity we have to work and build machines, planes, rockets, etc. In a perfect universe we wouldn't need to be tied down and we would be free to roam the universe at will.

FLAP CONTINUES..

More sightings continue to reach us since the last issue. Reports of strange ships being seen worldwide in our sky. Please report such incidents directly to us as soon as possible so we can include them in the very next issue.

January 23 - Ten year old Robin Burgess at 3:10 P.M. in Rocky Hill, Connecticut observed a round-shaped white object, ringed in black, and about four feet in diameter with one window in the center that made a whistling sound overhead above his home and reported it to his parents who in turn notified local authorities. (Credit: George Fawcett)

January 25 - Matthew Rybozyk noticed his TV set wouldn't work and upon investigating a humming noise outside his home in Manchester, N.H. discovered that the disturbance was caused by a strange object which was hovering nearby. Nearby residents told of interference on radios, TV and electric power was also effected.

March 4 - John F. Reeves a retired longshoreman from Brooklyn told of coming upon a 30 foot saucer in the area around Brookville, Florida while on a walk through the woods. He also told of seeing a strange robot like being who tried to take photographs of him. Strange depressions and footprints were discovered at the reported site as well as two pieces of paper which Reeves claims the robot dropped upon entering the craft.

March 14 - Mr. James W. Flynn, 45 of Fort Myers, Florida walked to within 150 feet of a bright yellow lighted cone shaped object while training hunting dogs in the Everglades. The object emitted a loud whirring noise and had four tiers of windows visible around the side. Suddenly he was knocked unconscious by a strange force. When he regained consciousness the UFO had disappeared (though a black, oily looking circle was found on the ground where the UFO had been). The doctor treated him for eye damage after the incident, which left him bloodshot and partially blinded due to the sudden blow. Both eyes were bandaged because of injuries received during the UFO encounter (Credit: George Fawcett, NICAP INVESTIGATOR and ABC's TV NIGHTLIFE)

March 31 - Burke, Idaho residents told of trees having been twisted off by some mysterious force on the steep hillside above an old mine and linked this with a brilliant object that swept across the area a night previous. Residents in the area also reported a rumbling noise on the night that the UFO appeared.

March 31 - Officials of the Canadian RCMP were attempting to track down the remains of a brilliant UFO that lit the skies over British Columbia, Alberta and parts of northwestern U.S. Their only clue was the smell of sulphur fumes still lingering in the air the following day. Two fires one in a lumberyard, flared up shortly after the object exploded in mid-air.

April 4 - Reports of formations of 12 to 14 unknown bodies, each with long firey tails passed over part of Denmark. One witness said the objects appeared to be on a guided and definite course with two of the crafts staying behind and later rejoining the formation again.

April 15 - Lester Broederdorf of Elgin, Illinois reported a white mass which had a blue and green tinge moving on a horizontal plane at about 7:30 p.m. It had an exhaust eight to ten times as long as the body.
